**Shakespeare's Poetic Styles** John Baxter, 2013-10-11 First published in 1980 At their most successful Shakespeare's styles are strategies to make plain the limits of thought and feeling which define the significance of human actions John Baxter analyses the way in which these limits are reached and also provides a strong argument for the idea that the power of Shakespearean drama depends upon the co-operation of poetic style and dramatic form Three plays are examined in detail in the text The Tragedy of Mustapha by Fulke Greville and Richard II and Macbeth by Shakespeare **Critical Approaches to Six Major English Works** R. M. Lumiansky, Herschel Baker, 2016-11-11 In each of these six essays treating the greatest literary accomplishments of medieval and renaissance England the author is concerned with the literary work as a whole and with a survey of recent critical approaches to it Beowulf by R E Kaske The Canterbury Tales by Richard L Hoffman Le Morte D'Arthur by Larry D Benson The Faerie Queen by A C Hamilton King Lear by Ernest William Talbert and Paradise Lost by Irene Samuel **Shakespeare and the Classical Tradition** Lewis Walker, 2019-05-24 This bibliography will give comprehensive coverage to published commentary in English on Shakespeare and the Classical Tradition during the period from 1961-1985 Doctoral dissertations will also be included Each entry will provide a clear and detailed summary of an item's contents For poems and plays based directly on classical sources like Antony and Cleopatra and The Rape of Lucrece virtually all significant scholarly work during the period covered will be annotated For other works such as Hamlet any scholarship that deals with classical connotations will be annotated Any other bibliographies used in the compiling of this volume will be described with emphasis on their value to a student of Shakespeare and the Classics Shakespeare's Poetics Ekbert Faas, 1986-01-30 This book tackles the topic of how Shakespeare viewed his own craft and creativity The Apocalypse in English Renaissance Thought and Literature C. A. Patrides, Joseph Anthony Wittreich, 1984 This remarkable collection of original essays by a distinguished group of American and English scholars explores attitudes toward apocalyptic thought and the Book of Revelation as they were reflected over many centuries in theological discourse political activity and artistic and literary endeavors **King Lear** Kevin J. Donovan, 2023-01-26 This volume documents the reception and interpretation of Shakespeare's tragedy King Lear by critics editors and general readers from the late 18th to the early 20th centuries Following an introduction which provides an historical account of the play's critical reception from the earliest times to the present day the volume presents a selection of original documents together with contextual head notes and

biographical sketches of the authors and a rationale for their selection as well as a list of suggested further reading. The chronological arrangement of the text excerpts engages the readers in a direct and unbiased dialogue whereas the introduction offers a critical evaluation from a current stance including modern theories and methods. Thus the volume makes a major contribution to our understanding of the play and of the traditions of Shakespearean criticism surrounding it as they have developed from century to century.

**Symplectic Geometry and Mirror Symmetry** Kodŭng Kwahagwŏn (Korea). International Conference, 2001. In 1993 M Kontsevich proposed a conceptual framework for explaining the phenomenon of mirror symmetry. Mirror symmetry had been discovered by physicists in string theory as a duality between families of three dimensional Calabi Yau manifolds. Kontsevich's proposal uses Fukaya's construction of the A category of Lagrangian submanifolds on the symplectic side and the derived category of coherent sheaves on the complex side. The theory of mirror symmetry was further enhanced by physicists in the language of D branes and also by Strominger Yau Zaslow in the geometric set up of special Lagrangian torus fibrations. It rapidly expanded its scope across from geometry topology algebra to physics. In this volume leading experts in the field explore recent developments in relation to homological mirror symmetry Floer theory D branes and Gromov Witten invariants. Kontsevich Soibelman describe their solution to the mirror conjecture on the abelian variety based on the deformation theory of A categories and Ohta describes recent work on the Lagrangian intersection Floer theory by Fukaya Oh Ohta Ono which takes an important step towards a rigorous construction of the A category. There follow a number of contributions on the homological mirror symmetry D branes and the Gromov Witten invariants e.g. Getzler shows how the Toda conjecture follows from recent work of Givental Okounkov and Pandharipande. This volume provides a timely presentation of the important developments of recent years in this rapidly growing field.
