Horowitz,2020-03-02 This volume modeled after those published in The Library of Living Philosophers attempts to provide a coherent statement of the work of Abraham Edel in moral and political theory and on the impact of his work on such diverse areas as education law and social science Handbook of Social Psychology John DeLamater,2006-11-24 Psychology

focusing on processes that occur inside the individual and Sociology focusing on social collectives and social institutions come together in Social Psychology to explore the interface between the two fields The core concerns of social psychology include the impact of one individual on another the impact of a group on its individual members the impact of individuals on the groups in which they participate the impact of one group on another This book is a successor to Social Psychology Social Perspectives and Sociological Perspectives in Social Psychology The current text expands on previous handbooks in social psychology by including recent developments in theory and research and comprehensive coverage of significant theoretical perspectives **The Empathic God** Frank Woggon,2024-05-07 What if Jesus did not come to die for our sins What if

instead Jesus s life and death was intended to provide a way out of our shame While traditional Christian teachings about the atonement emphasize sin as guilt and transgression against God s will and commandments Frank Woggon points out that clinical spiritual care reveals that the human condition is predominantly marked by shame rather than guilt In The Empathic God Woggon examines myopic readings of the Jesus event that in turn have embedded distortions into traditional paradigms of the atonement In contrast Woggon mines narratives of the human condition to engage in a critical examination of the Jesus story As a clinician and ordained Baptist minister Woggon presents the Jesus event as God s empathic initiative toward humanity and convincingly argues that salvation comes through empathy rather than forgiveness Woggon s work constructs a clinical theology of at onement from the perspective of clinical spiritual care The Empathic God calls for a practical response of caring participation in God s ongoing work of salvation through an empathic praxis of spiritual care Most importantly The Empathic God takes seriously that lived human experience is the starting point for theological exploration rather than doctrine This book will help practitioners and students of spiritual care in the Christian tradition to reflect more critically on the intersection of spiritual care practice and theology The book also will challenge pastors ministers of pastoral care chaplains pastoral counselors spiritually oriented therapists to interrogate and re interpret traumatic shame filled Christian teachings about the atonement so that they too can join in God s ongoing and liberating work of salvation The Freud Encyclopedia Edward Erwin,2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Restorative Justice: Theoretical foundations Elmar G. Genes on the Couch Paul Gilbert, Kent G. Bailey, 2014-07-10 Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin's theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration *Genes on the Couch* brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance cooperation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasingly important but diverse area *Genes on the Couch* will be of interest to psychotherapists psychiatrists and a wide range of mental health professionals
