The Palaeolithic Origins of Human Burial Paul Pettitt,2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus Homo early Homo sapiens the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished *The Origins of Modern Humans* Fred H. The Dream Culture of the Neanderthals Stan Gooch, 2006-01-12 Explores the influence of Neanderthal man on the cultural and biological development of humanity Traces the power of long held beliefs and superstitions to the influence of Neanderthal lunar and dream based traditions Offers a compelling vision of a unified humanity that can benefit from the gifts of both its Neanderthal and Cro Magnon ancestors Provides evidence that direct descendants of the Neanderthal race may still be alive in Central Asia A number of long standing beliefs and superstitions show how the ideas that dominated the lives of our ancestors still have a powerful influence on us today The disturbing power attributed to the number thirteen the positive influence of the number seven and the comfort offered by the admonition knock wood all reveal the enduring presence of our most ancient ancestors the Neanderthals Contrary to current theories Stan Gooch maintains that the Neanderthals were not destroyed by the younger Cro Magnon culture but were incorporated into that culture through interbreeding The blending of the disparate influences of the lunar matriarchal based Neanderthals and the solar patriarchal Cro Magnons may explain the contradictory impulses and influences that have generated human conflict for millennia In fact the author suggests that the caste system in India may have been constructed to utilize the strengths of both lunar and solar cultures and to minimize the conflict between the two There is evidence that direct descendents of the moon worshipping dream cultivating Neanderthal race are still living in Central Asia today While their physical descendants may be almost extinct the influence of Neanderthal wisdom remains strong and can be found not only in witchcraft lore and the Kabbalah but in the formative tenets of the Knights Templar the Rosicrucians and even Christianity
