Shaping Postwar Europe European Unity And Disunity 1945 1957:

Shaping Postwar Europe Peter M. R. Stirk, David Willis, 1991-01-01 **Themes in Modern European History Since 1945** Rosemary Wakeman, 2003 Twelve chapters consider the key political cultural and economic changes of post 1945 Europe **The Dynamics of European Security Cooperation, 1945-91** Gülnur Aybet, 2016-01-12 This is the first integrated analysis of all aspects of security cooperation in western Europe from 1945 to 1991 It provides an accessible yet sophisticated survey of the wider dynamics of security cooperation in each decade throughout this period It covers all aspects of security cooperation which range from the political such as a European voice in arms control to military such as a European input into NATO strategy and economic involving collaboration in defence technology and production *Building Postwar Europe* Anne Deighton, 2016-07-27 Controversy surrounds the construction of postwar European institutions Did West European states simply respond to American pressure and Cold War politics How important was federalist idealism as opposed to economic and power political factors to decision makers These studies by an international team of historians examine the motivations of national political leaders and their officials Topics covered include British and French officials European integration and military policies German Italian Belgian and Dutch attitudes Britain and the first attempt to join the EEC and the covert relationship between the USA and the European federalists **A Converging Post-War European Discourse** Thomas C. Hoerber, 2014-12-24 This book explores the most important components and contributing factors to the European integration process during the 1950s It seeks to combine comparative politics and political history to examine core themes such as war experience national security military security economic security societal security and research and education in three major European countries i e France Germany and Britain It analyses the references to the ensuing European integration process in national parliamentary debates analyzing which national needs were thought European integration could cater to but also which national positions were seen as being compromised by a closer European commitment The development of a national position on European integration and in turn the evolution of European concepts are considered by using discourse theory on parliamentary debates in France Germany and Britain Parliamentary discourses are shown to be an ideal source for analyzing grand themes such as European integration because they cover all fundamental ideas they have to be public and open ended deliberations which in turn determined the position of each country towards European integration The great variety of positions reflected in the parliamentary discourse in particular those which did not prevail and which did not find their way into the commonly accepted historical storyline of European integration provide a greater comprehensiveness and a better understanding of the history of the European integration process The Foundations of Europe Thomas Hörber, 2007-12-18 Thomas Hörber analyses the building process of European integration He shows the parliamentary discourses of France Germany and Britain to be representative of the national position of these states towards the developing concept of Europe He covers all key events and developments of the time which had an impact

on the European integration process and provides an explanation for the convergence of national discourses towards a common Europe This development was by no means a given and the analysis of parliamentary debates shows for the first time how vigorous the debates were on European integration in the 1950s and how despite setbacks notably the failure of the European Defence Community the discussion went in favour of integration

The Origins of the Contemporary Global Order Carl J. Strikwerda, 2025-01-17 This book offers a new interpretation of the origins of the contemporary global order the set of institutions and international practices created by the USA and its allies after the Second World War Previous interpretations have argued that the USA played the predominant role in creating the global order to fight the Cold War against the Soviet Union The author argues that a broader perspective is necessary to understand both the origins of the global order and its ongoing tensions up until today a perspective that includes the legacy of both world wars the role of imperialism and the alternative strategy of globally oriented economic blocs The cooperative tradition in the founding of the global order and the contributions of nations besides the USA provides useful insights for those interested in the current global order and the challenges it faces from Russia and China

From Disarmament to Rearmament Sheldon A. Goldberg, 2017-10-02 At the end of World War II the Allies were unanimous in their determination to disarm the former aggressor Germany As the Cold War intensified however the decision whether to reverse that policy and to rearm West Germany as a bulwark against the Soviet threat led to disagreements both within the US government and among members of the nascent NATO alliance The US military took the practical view that a substantial number of German troops would be required to deter any potential Soviet assault The State Department on the other hand initially advocated an alternative strategy of strengthening European institutions but eventually came around to the military's position that an armed West Germany was preferable to a weak state on the dividing line between the Western democracies and the Soviet satellite states Sheldon A Goldberg traces the military diplomatic and political threads of postwar policy toward West Germany and provides insights into the inner workings of alliance building and the roles of bureaucrats and military officers as well as those of diplomats and statesmen He draws on previously unexamined primary sources to construct a cogent account of the political and diplomatic negotiations that led to West Germany's accession to NATO and the shaping of European order for the next forty years

Manipulating Hegemony R. Vickers, 2000-02-17 Drawing on neo Gramscian theories of International Political Economy this book explores the impact of the Marshall Plan on labour and government in Britain Rather than the US imposing a politics of productivity on an unwilling government the centre right of the Labour Party used the Marshall Plan to achieve its own political ends *Manipulating Hegemony* shows how the government was able to marginalise the left to create a pattern of state labour politics that was to endure until the end of the 1970s

Britain, Germany and the Cold War R. Gerald Hughes, 2007-06-11 This well researched book details the ambiguity in British policy towards Europe in the Cold War as it sought to pursue détente with the Soviet Union whilst upholding its commitments to its NATO allies From the early 1950s Britain pursued a dual policy of

strengthening the West whilst seeking détente with the Soviet Union British statesmen realized that only through compromise with Moscow over the German question could the elusive East West be achieved Against this the West German hard line towards the East endorsed by the United States was seen by the British as perpetuating tension between the two blocs This cast British policy onto an insoluble dilemma as it was caught between its alliance obligations to the West German state and its search for compromise with the Soviet bloc Charting Britain's attempts to reconcile this contradiction this book argues that Britain successfully adapted to the new realities and made hitherto unknown contributions towards détente in the early 1960s whilst drawing towards Western Europe and applying for membership of the EEC in 1961 Drawing on unpublished US and UK archives Britain Germany and the Cold War casts new light on the Cold War the history of détente and the evolution of European integration This book will appeal to students of Cold War history British foreign policy German politics and international history
