Basketball Position Metric: the Evolution Is Being Televised Rashad Phillips, 2022-10-28 In sports, proper identity is key. We celebrate players, we glorify their existence, we marvel at their talent, and we cherish the moments that they give us. But the game that they are playing goes deeper than the surface we see. Who are they? What are they? Positions were given out to players over 70 years ago, and we continue to identify them with just these labels. In doing this, we've ignored a huge component that plays a part in the world we live in. And that's evolution. In this book, Rashad takes us on an exciting journey in which he tells the stories of players, identifies them properly, and he dissects the game from where it was to where it is today. He shares never-heard-before stories of the game's greatest players and rearranges the legacies of many with his new position metric.
