Inca Rituals and Sacred Mountains Maria Constanza Ceruti,Johan

Reinhard,2010-12-31 The Incas carried out some of the most dramatic ceremonies known to us from ancient times Groups of people walked hundreds of miles across arid and mountainous terrain to perform them on mountains over 6 096 m 20 000 feet high The most important offerings made during these pilgrimages involved human sacrifices capacochas Although Spanish chroniclers wrote about these offerings and the state sponsored processions of which they were a part their accounts were based on second hand sources and the only direct evidence we have of the capacocha sacrifices comes to us from archaeological excavations Some of the most thoroughly documented of these were undertaken on high mountain summits where the material evidence has been exceptionally well preserved In this study we describe the results of research undertaken on Mount Llullaillaco 6 739 m 22 109 feet which has the world s highest archaeological site The types of ruins and artifact assemblages recovered are described and analyzed By comparing the archaeological evidence with the chroniclers accounts and with findings from other mountaintop sites common patterns are demonstrated while at the same time previously little known elements contribute to our understanding of key aspects of Inca religion This study illustrates the importance of archaeological sites being placed within the broader context of physical and sacred features of the natural landscape
