The Year's Best Science Fiction: Thirteenth Annual Collection Gardner Dozois, 1996-05-15 Annual collection of outstanding science fiction stories showcasing the highest levels of creativity and craft in the genre. **The Fictional 100** Lucy Pollard-Gott, PhD, 2010-01-13 Some of the most influential and interesting people in the world are fictional: Sherlock Holmes, Huck Finn, Pinocchio, Anna Karenina, Genji, and Superman, to name a few, may not have walked the Earth or flown in Superman's case, but they certainly stride through our lives. They influence us personally as childhood friends, catalysts to our dreams, or even fantasy lovers. Peruvian author and presidential candidate Mario Vargas Llosa, for one, confessed to a lifelong passion for Flaubert's *Madame Bovary*. Characters can change the world. Witness the impact of Solzhenitsyn's Ivan Denisovich in exposing the conditions of the Soviet Gulag, or Harriet Beecher Stowe's *Uncle Tom* in arousing anti-slavery feeling in America. Words such as quixotic, oedipal, and herculean show how fictional characters permeate our language. This list of the Fictional 100 ranks the most influential fictional persons in world literature and legend from all time periods and from all over the world, ranging from Shakespeare's Hamlet 1 to Toni Morrison's *Beloved* 100. By tracing characters' varied incarnations in literature, art, music, and film, we gain a sense of their shape-shifting potential in the culture at large. Although not of flesh and blood, fictional characters have a life and history of their own. Meet these diverse and fascinating people. From the brash Hercules to the troubled Holden Caulfield, from the menacing plots of Medea to the misguided schemes of Don Quixote, *The Fictional 100* runs the gamut of heroes and villains, young and old, saints and sinners. Ponder them, fall in love.

Davis, 2005-07-14 Nondescriptive Meaning and Reference extends Wayne Davis s groundbreaking work on the foundations of semantics Davis revives the classical doctrine that meaning consists in the expression of ideas and advances the expression theory by showing how it can account for standard proper names and the distinctive way their meaning determines their reference He also shows how the theory can handle interjections syncategorematic terms conventional implicatures and

other cases long seen as difficult for both ideational and referential theories The expression theory is founded on the fact that thoughts are event types with a constituent structure and that thinking is a fundamental propositional attitude distinct from belief and desire Thought parts ideas or concepts are distinguished from both sensory images and conceptions Word meaning is defined recursively sentences and other complex expressions mean what they do in virtue of what thought parts their component words express and what thought structure the linguistic structure expresses and unstructured words mean what they do in living languages in virtue of evolving conventions to use them to express ideas The difficulties of descriptivism show that the ideas expressed by names are atomic or basic The reference of a name is the extension of the idea it expresses which is determined not by causal relations but by its identity or content together with the nature of objects in the world Hence a name's reference is dependent on but not identical to its meaning A name is directly and rigidly referential because the extension of the idea it expresses is not determined by the extensions of component ideas The expression theory thus has the strength of Fregeanism without its descriptivist bias and of Millianism without its referentialist or causalist shortcomings The referential properties of ideas can be set out recursively by providing a generative theory of ideas assigning extensions to atomic ideas and formulating rules whereby the semantic value of a complex idea is determined by the semantic values of its components Davis also shows how referential properties can be treated using situation semantics and possible worlds semantics The key is to drop the assumption that the values of intension functions are the referents of the words whose meaning they represent and to abandon the necessity of identity for logical modalities Many other pillars of contemporary philosophical semantics such as the twin earth arguments are shown to be unfounded

How High the Sky? Thomas Gangale, 2018-11-26 In *How High the Sky* jurist Thomas Gangale explores the oldest and most important controversy in space law how far up does national airspace go and where does the international environment of outer space begin Even though nations did not object to the first satellites flying over their sovereign territory after more than six decades there is still no international agreement on how low the right of space object overflight extends nor are there agreed legal definitions of space object and space activity Dr Gangale brings his background as an aerospace engineer to bear in exploding long held beliefs of the legal community and he offers a draft international convention to settle the oldest and most intractable problems in space law

Metaphysics, Mathematics, and Meaning Nathan Salmon, 2005-11-24 *Metaphysics Mathematics and Meaning* brings together Nathan Salmon's influential papers on topics in the metaphysics of existence non existence and fiction modality and its logic strict identity including personal identity numbers and numerical quantifiers the philosophical significance of Gödel's Incompleteness theorems and semantic content and designation Including a previously unpublished essay and a helpful new introduction to orient the reader the volume offers rich and varied sustenance for philosophers and logicians

Saul Kripke Alan Berger, 2011-06-06 This collection of essays on Saul Kripke and his philosophy is the first and only collection of

essays to examine both published and unpublished writings by Kripke. Its essays written by distinguished philosophers in the field present a broader picture of Kripke's life and work than has previously been available to scholars of his thought. New topics covered in these essays include vacuous names and names in fiction, Kripke on logicism and *de re* attitude toward numbers, Kripke on the incoherency of adopting a logic, Kripke on colour words and his criticism of the primary versus secondary quality distinction and Kripke's critique of functionalism. These essays not only present Kripke's basic arguments but also engage with the arguments and controversies engendered by his work, providing the most comprehensive analysis of his philosophy and writings available. This collection will become a classic in contemporary analytic philosophy. The New Quantum Universe Anthony J. G. Unleadership Selen Kars-Ünlüoğlu, Carol Jarvis, Hugo Gaggiotti, 2024-03-04 Leaderly acts and practices from unexpected places are often overlooked and yet have remarkable power. These spontaneous acts are in sharp contrast to those of formal leaders in governments and leading corporations. Global events like the Covid 19 pandemic and the climate crisis light up these differences. This book delves deeper exploring these leaderly acts and practices more fully and beyond extraordinary events. The authors describe these as unleadership, a term defined in this book as a set of acts and practices that are undertaken in a spirit of spontaneity and generosity for social good. Four dimensions of unleadership are identified in this book: paying it forward, living with the unknown, catching the wave, and confidently connecting and collaborating. Unleadership exposes the potential that is unleashed when members of the community discover their own power to act and reclaim what they have delegated to their leaders. Based on extensive research, the authors highlight the flourishing of alternative forms of leading that encourage rethinking ideas of leadership and followership. They provide practical guidance to organisations and practitioners for enriching their leaderly capacity and cultivating unleadership practices to co-exist with and complement leadership practices. Unleadership is an invaluable resource for leaders and managers in public and private organisations as well as students of leadership and organisational development.
