

A photograph of a forest path with two diverging roads. The path is made of dark, wet gravel or asphalt, and the surrounding ground is covered in fallen yellow and orange leaves. The background is a dense forest of tall, thin trees with green foliage.

Two roads diverged in a wood and I,
I took the one less traveled by.
And it has made all the difference.

Long Road Travelled An Account Of Forest:

Clearcutting the Pacific Rain Forest Richard A. Rajala, 2011-11-01 This book integrates class environmental and political analysis to uncover the history of clearcutting in the Douglas fir forests of B C Washington and Oregon between 1880 and 1965 Part I focuses on the mode of production analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization The introduction of steam powered overhead logging methods provided industry with a rudimentary factory regime by 1930 accompanied by productivity gains and diminished workplace autonomy for loggers After a Depression inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post war period achieving complete mechanization of yarding with the automatic grapple Driving this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions product and labour markets but sought to advance operators class interests by routinizing production The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement Requiring expertise in the organization of an expanded technologically sophisticated exploitation process operators presided over the establishment of logging engineering programs in the region s universities Graduates introduced rational planning procedures to coastal logging contributing to a rate of deforestation that generated a corporate call for technical forestry expertise after 1930 Industrial foresters then emerged from the universities to provide firms with data needed for long range investment decisions in land acquisition and management Part II constitutes an environmental and political history of clearcutting This reconstructs the process of scientific research concerning the factory regime s impact on the ecology of the Douglas fir forest assessing how knowledge was utilized in the regulation of cutting practices Analysis of business government relations in British Columbia Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends *Saving Forest Ecosystems* Robert L. Edmonds, 2021-02-02 After the first Euro American settlers arrived in Seattle in the 1850s the surrounding old growth forests were rapidly harvested for lumber causing environmental degradation and displacing native peoples Conflicts about the future of Pacific Northwest forests have continued since then Only recently have academics government agencies industry small private landowners tribes and environmental organizations come together to develop plans to protect the remaining old growth forests wildlife streams and fish as well as providing environmentally friendly forest products Practicing sustainable forestry maintaining healthy forests that are less susceptible to fire insects and diseases and fostering public enjoyment are now the main goals of forest management However conflicts still exist and with climate change a looming threat it is important to realize that forests give us much more than lumber Robert L Edmonds professor emeritus at the School of

Environmental and Forest Sciences University of Washington UW wrote this book to bring attention to the sustainability of natural resources He describes how Washington State s forests and the practice of forestry have changed through time and how these changes relate to the long history of research and teaching at the UW Its scope extends beyond Washington many of the principles of sustainable forestry developed by faculty have been adopted worldwide **Winch and cable systems I.** Samset,2013-03-14 The book is a civil engineering handbook on winch and cable systems The handbook may be used as textbook for university studies in civil engineering and forestry and as the basis for studies in schools on a technical level It should be a useful reference book for construction engineers civil engineers logging engineers foresters and leaders of operational activities under difficult terrain conditions The content in the book is based on more than 35 years experience with practical winch and cable operations As a leader of the Norwegian Institute of Forest Operations the author has carried out research work in this field since 1947 The Institute is the owner of yarders winches cable cranes etc and with its own cable crews the Institute operates as a contractor in its own research forests as well as in other state or privately owned forests throughout Norway The research work also includes other cable crane operations in Norway and other countries As the leader of the Joint FAO ECE ILO Study Group on Mechanized Forest Operations the author studied cable operations in most of the Eastern and Western European countries As president of the International Union of Forestry Research Organizations the author visited most forest countries in the world Information from research and practical cable crane operations were collected The handbook is based on material on winch and cable systems used in Japan New Zealand Soviet Union Central Europe Northern Europe Eastern United States Western United States and British Columbia Accounts of My Travels F.
