Bringing together examples of modern and contemporary fiction from Defoe to DeLillo, Frankenstein to Finnegans Wake and theoretical discussions of the modern and the post modern, the author explores the legacy of modern transformations of space and time under five headings: The Space of Nature, The Space of the City, Postmodern or Most Modern Time, The Time and Space of the Work of Art in the Age of Digital Reproduction, and Travel from Modernity to These. Five essays re-examine the meanings of modernity and its aftermath in relation to the spaces and times of the natural, the urban, and the media environment.
