2004 I. Elmadfa, Elisabeth Weichselbaum, 2005-01-01 The European Nutrition and Health Report is the first comprehensive assessment of the present status of nutrition and health in Europe and of the available resources and requirements for compatible and representative data from different countries 13 EU member states and Norway have participated in this project pursuing three main goals Compilation of available nutrient intake and health data Identification of major nutrition and health problems Identification of problems concerning the methods and compatibility of data collection The main topics include food supply and availability energy and nutrient intake in different age groups health indicators and status obesity physical activity and smoking The Appendix offers a detailed publication of national reports and single projects This book provides a solid basis for the planning of future projects in nutrition and health and should be of great interest to all professionals in the fields of nutrition preventive medicine and public health as well as to health policy makers *Gambling, Work and Leisure (Routledge Revivals)* David Downes, D. M. Davies, M. E. David, P. Stone, 2014-06-17 Since the legalisation of off course cash betting in 1960 and the rise of varying forms of gambling the British have come to be known as a nation of gamblers Until this study was published in 1976 barely any evidence existed against which to assess the claim that gambling had become a major social problem The authors present data drawn from area surveys carried out in Swansea Sheffield Wanstead and Woodford and explore how well previous sociological theories of gambling agree with their findings particular in connection with certain aspects of work and leisure Examining different forms of gambling including betting bingo and gaming machines the chapters consider how gambling choices vary between different social groups and how much time and money is spent on them With the internet making it easier than ever before to place bets this title is especially relevant and provides a systematic basis for an explanation of gambling in relation to social structure Comparative Quantification of Health Risks: Sexual and reproductive health Majid Ezzati, 2004 Over the centuries human health has improved because science has come to understand the main causes of disease affecting populations At the same time the broader policy relevant issue of population exposure to risks has remained under explored relative to documentation of established diseases This publication provides a comprehensive assessment of the scientific evidence on prevalence and the resulting health effects of a range of exposures that are known to be hazardous to human health *The Works of Nathaniel Lardner* Nathaniel Lardner, 1815
