Freitag, 1997 Expanded to twice as many entries as the 1985 edition and updated with new publications new editions of previous entries titles missed the first time around more of the artists own writings and monographs that deal with significant aspects or portions of an artists work though not all of it The listing is alphabetical by artist and the index by author The works cited include analytical and critical biographical and enumerative their formats range from books and catalogues raisonnés to exhibition and auction sale catalogues A selection of biographical dictionaries containing information on artists is arranged by country Annotation copyrighted by Book News Inc Portland OR The Barcelona Pavilion by Mies van der Rohe Dietrich Neumann, 2020-12-07 While Mies van der Rohes pavilion at the International Exposition in Barcelona in 1929 went unnoticed by most of the visitors to the fairgrounds contemporary critics enthusiastically hailed it as the most convincing statement of the Modern Age This book presents 100 selected texts about this much discussed building written then and now from the opening speech by the Spanish king to newspaper articles and private letters voices of contemporary architects architecture critics and historians and even a text by artist Ai Weiwei who created an installation in the outdoor area of the pavilion in 2010 Thus the history of this buildings reception depicts a dazzling picture and inconceivable breadth including statements by such eminent authors as Frank Lloyd Wright Leonardo Benevolo Rem Koolhaas Peter Eisenman

American Architects and the Mechanics of Fame Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority

do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields *Annotated Bibliography of Chicago History* Frank Jewell,1979 **Building Desire** George Dodds,2005-08-08 An in depth look at the unique Barcelona Pavilion its many and complex identities through history and its enduring appeal

The Rise of the Joyful Economy Michael Hutter,2015-03-24 This book argues for the increasing importance of the arts as a major resource in fuelling growth through the experiential dimension of today s economy As we move from the knowledge economy to a new stage called the joyful economy consumers shift their spending from physical objects and technical know how to experiences of joy and disappointment This book investigates how artistic ideas are translated into successful commercial production and how economic growth impacts artistic invention It examines cases of successful innovation in the creative industries ranging from the Italian Renaissance to the present The book suggests a framework where social players move in diverse worlds of value which leads to a stream of controversies and manias that result in the establishment of new joy products Studies include the effect of linear perspective as pioneered by Filippo Brunelleschi the discovery of taste as an argument for consumption the serial production of Pop Art and the self commercialization of contemporary works by artists like Takashi Murakami This theoretical and empirical study brings together the fields of cultural economics economic sociology management studies and cultural history In doing so it offers a fascinating study of how creativity has shaped and fuelled commerce **Mies Van Der Rohe** Wolf Tegethoff,1985 This detailed and carefully reasoned study of the domestic architecture of Mies van der Rohe is a landmark contribution to contemporary understanding of the great architect s work It is devoted to a close analysis of Mies residential architecture built and unbuilt from 1923 to 1951 Many of its conclusions are pertinent to the whole of Mies output The book presents penetrating discussions of both the Concrete and the Brick Country House projects two of the famous Five Projects of the 1920s which made Mies early reputation and among others the Lange and Esters Houses of 1927 1930 the Barcelona Pavilion and Tugendhat House of 1928 1930 and in America plans for a house in Wyoming for the Stanley Resors and the Farnsworth House of 1946 1951 The analysis and the illustrations demonstrate a continuous development toward realization of the goal Mies himself described To bring Nature houses and people into a higher unity The original German language edition accompanied an exhibition

organized by the Kaiser Wilhelm Museum Krefeld in conjunction with the Mies van der Rohe Archive of the Museum of Modern Art New York on the occasion of the public opening of the restored Lange and Esters Houses now owned by the Kaiser Wilhelm Museum All of the works exhibited are reproduced in this volume Dr Tegethoff's text based on extensive research in the Mies Archive and other sources brings to light much new information on the origins of Mies's ideas his working methods and relationships with clients as well as the actual planning and structure of the houses Wolf Tegethoff is a member of the faculty of the Kunsthistorische Institut of the University of Kiel Germany
