The Prairie Agrarian Movement Revisited Kenneth Murray Knuttila, 2007 The formation of the Territorial Grain Growers Association in 1901 was not the only important event in the early history of what has come to be known broadly as the agrarian movement in the Canadian prairies but it was a defining moment in some respects Arguably it signalled the formation of an agrarian class but at least it was an indicator of an awakening of a democratic consciousness among family farmers Ultimately the Association provided a venue for analysis and critique the development of strategies and tactics and of course the nurturing of leadership and organizational forms that would have a profound influence upon politics and the state in the three prairie provinces and the Dominion as well as the creation of co operatives and other forms of direct action These eighteen essays honouring the 100th anniversary in 2001 of the formation of the TGGA explore important aspects of the historical legacy of the agrarian movement and contemplate their relevance to the current setting for the rural prairies pub desc

Networking the Farm Randy Ziegenhorn, 2018-12-20 Published in 1999 this book presents the results of an ethnographic study of the emergence of co operative production networks among hog farm workers in Iowa In it the author assesses both the internal organizational requirements for the successful network formation and the potential for networks to give farmers a competitive edge in the swine industry Departing from the traditional emphasis on individual decision making in agricultural economies and economic anthropology this book emphasizes instead the institutional setting in which such networks are formed The author argues that networks succeed when they are closely tied to and reflective of local social structure Those networks that attempt to employ a master plan designed by experts often fail Although many successful networks exist networking has yet to achieve the economic clout enjoyed by large scale corporate swine producers The author describes the availability of credit for new swine production

ventures in Iowa and shows the extent to which large scale producers have developed network like connections with banks packers and contract producers

Environment and Culture Irwin Altman, Joachim F. Wohlwill, 2013-06-29 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation

Arctic Adaptations Igor Krupnik, 2002-06-01 The common view of indigenous Arctic cultures even among scholarly observers has long been one of communities continually in ecological harmony with their natural environment In Arctic Adaptations Igor Krupnik dismisses

the textbook notion of traditional societies as static Using information from years of field research interviews with native Siberians and archaeological site visits Krupnik demonstrates that these societies are characterized not by stability but by dynamism and significant evolutionary breaks Their apparent state of ecological harmony is in fact a conscious survival strategy resulting from a prolonged and therefore successful process of human adaptation in one of the most extreme inhabited environments in the world As their physical and cultural environment has changed fluctuating reindeer and caribou herds unpredictable weather patterns introduction of firearms and better seacraft Arctic communities have adapted by developing distinctive subsistence practices social structures and ethics regarding utilization of natural resources Krupnik's pioneering work represents a dynamic marriage of ethnography and ecology and makes accessible to Western scholars crucial findings and archival data previously unavailable because of political and language barriers

The Ecological Transition John W. Bennett, 2017-09-29 Written during the height of the ecology movement *The Ecological Transition* is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environment in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract

resource available **Himalayan Households** Thomas Earl Fricke,1994 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers **Mountain, Field, and Family** Stephen B. Family Farming In Europe And America Boguslaw Galeski,2020-09-23 Much has happened since agricultural economists and rural sociologists met at the University of Chicago in 1946 to discuss family farming The problems and issues related to the structure of agriculture have been intensified by current economic considerations which promote the growth of larger scale commercial farming operations and edge out many smaller farms owned operated and worked by families In this book contributors from eleven nations in Europe and North America provide a comparison of farm structure under different economic and political systems including Poland as an example of a non market economy In addition to providing information on how local state and international policies have affected the agricultural enterprise they look at the role of farmers organizations in policy formulation and take note of changes in farm patterns and policies that have had an impact on farm production off farm work and the welfare of farm families and rural communities **Settlement Ecology** Glenn Davis Stone,2022-11-08 What determines agrarian settlement patterns Glenn Davis Stone addresses this question by analyzing the

spatial aspects of agrarian ecology the relationship between how farmers farm and where they settle and how farming and settlement change as population density rises Crosscutting the fields of cultural anthropology archaeology geography and agricultural economics Settlement Ecology presents a new perspective on the process of agricultural intensification and explores the relationships between intensification and settlement decision making Stone insists that paleotechnic traditional agriculture must be seen as a social process with the social organization of agricultural work playing a key role in shaping settlement characteristics These relationships are demonstrated in a richly documented case study of the Kofyar who have been settling a frontier in the Nigerian savanna The history of agricultural change and the development of the settlement pattern are reconstructed through ethnography archival research and aerial photos and are analyzed using innovative graphical methods Stone also reflects on the limits of ecological determination of settlement comparing the farming and settlement trajectories of the Kofyar and Tiv on the same frontier
