Measuring the Performance of Public Services Michael Pidd, 2012-02-02 Measuring the performance of public agencies and programmes is essential to ensure that citizens enjoy quality services and that governments can be sure that taxpayers receive value for money As such good performance measurement is a crucial component of improvement and planning monitoring and control comparison and benchmarking and also ensures democratic accountability This book shows how the principles uses and practice of performance measurement for public services differ from those in for-profit organisations being based on the need to add public value rather than profit It describes methods and approaches for measuring performance through time for constructing and using scorecards composite indicators the use of league tables and rankings and argues that data envelopment analysis is a useful tool when thinking about performance This demonstrates the importance of allowing for the multidimensional nature of performance as well as the need to base measurement on a sound technical footing Ethics and Economics Mark D. White, Irene van Staveren, 2013-09-13 Since the days of Adam Smith ethics and economics have been closely intertwined and were nominally separated only with the advent of neoclassical economics in the beginning of the last century This book features eleven essays by leading scholars in economics and philosophy who argue for a renewal of the bond between the two disciplines Several of the contributors argue that the ethical content of economics and moral status of the market have been misunderstood for better and for worse Some recommend

changes in the way that individual economic choice is modelled in order to incorporate ethical as well as self interested motivations Finally others question the way that societies assess economic policies that affect the welfare and dignity of their constituents A wide range of philosophical perspectives is offered drawing from the classic writings of Adam Smith Immanuel Kant and the ancient Stoics to that of current scholars such as Amartya Sen Elizabeth Anderson and Christine Korsgaard This book provides a comprehensive introduction to the cutting edge of interdisciplinary research between ethics and economics and is sure to be an important resource for scholars in both fields This book was published as a combination of the special issues Review of Political Economy and Review of Social Economy **The Social Construction of Public Administration**

Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens *Decisions, Technology and Organization* Audley Genus, 2017-11-22 This title was first published in 2000 This text analyzes the problems of managing large scale technology projects It addresses the contrast between projects hoped for benefits and the optimism with which they are promoted and the high human economic or environmental costs of their operation The book is multi disciplinary in its approach and an integration of different levels of analysis It contains case studies that are analyzed in terms of the literatures on decision theory public administration and strategic and project management *What Works?* Nutley, Sandra M., Davies, Huw T.O., Peter C. Smith, 2000-07-19 An exploration of how the knowledge gained from research is used to improve the effectiveness of public policy formation and public service delivery It covers eight areas of public service health education criminal justice social policy transport urban policy housing and social care *Managing Sustainable Development* Michael Carley, Ian Christie, 2017-09-25 In a world where environmental problems spill across political administrative and disciplinary boundaries there is a pressing need for a clear understanding of the kinds of organizations management structures and policy making approaches required to bring about socially equitable and ecologically sustainable development In this second edition the authors incorporate lessons from a decade of work on the conditions of sustainability in both developed and developing countries They prescribe action networks partnerships of flexible achievement oriented
