victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Transcultural Architecture Thorsten Botz-Bornstein,2016-03-09 Critical Regionalism is a notion which gained popularity in architectural debate as a synthesis of universal modern elements and individualistic elements derived from local cultures

This book shifts the focus from Critical Regionalism towards a broader concept of Transcultural Architecture and defines Critical Regionalism as a subgroup of the latter. One of the benefits that this change of perspective brings about is that a large part of the political agenda of Critical Regionalism which consists of resisting attitudes forged by typically Western experiences is softened and negotiated according to premises provided by local circumstances. A further benefit is that several responses dependent on factors that initial definitions of Critical Regionalism never took into account can now be considered. At the book's centre is an analysis of Reima and Raili Pietilä's Sief Palace Area project in Kuwait. Further cases of modern architecture in China, Korea and Saudi Arabia show that the critique which holds that Critical Regionalism is a typical western exercise is not sound in all circumstances. The book argues that there are different Critical Regionalisms and not all of them impose Western paradigms on non-Western cultures. Non-Western regionalists can also successfully participate in the Western enlightened discourse even when they do not directly and consciously act against Western models. Furthermore, the book proposes that a certain architectural rationality can be contained in architecture itself, not imposed by outside parameters like aesthetics, comfort or even tradition, but flowing out of a social game of which architecture is a part. The key concept is that of the form of life as developed by Ludwig Wittgenstein, whose thoughts are here linked to Critical Regionalism. Kenneth Frampton argues that Critical Regionalism offers something well beyond comfort and accommodation. What he has in mind are ethical precepts closely linked to a *A Global History of Architecture*. Francis D. K. Ching, Mark M. Jarzombek, Vikramaditya Prakash, 2010-12-13. The award-winning First Edition of *A Global History of Architecture* was a publishing event that forever changed the way architectural history is viewed and studied. This Second Edition surpasses the first with a lavish new design illustrated throughout with drawings and photographs in full color and even more maps and diagrams detailing global interconnections. The signature drawings of Francis D. K. Ching are more informative than ever, updated with scale annotation and function added where needed. This revision is sure to remain the most relevant book on the topic. Library of Congress Subject Headings. Library of Congress. Cataloging Policy and Support Office, 2007.

Signs for the Times Chris Brooks, 2016-07-01. First published in 1984, *Signs for the Times* explores imaginative and creative relationships between three major areas of mid-Victorian arts: literature, painting, and architecture. Through the detailed critical analysis of particular novels, prose writings, paintings, and buildings, Chris Brooks establishes a fusion of realistic and symbolic values that he sees as central to the Victorian creative imagination. He argues that the creative achievement of the mid-nineteenth century needs to be seen far more as a whole than it has previously, and that fundamental imaginative terms are common to art and architecture to major theoretical writers such as Carlyle, Ruskin, and Rugin, as well as to the central literary figure of Dickens. All those interested in literature, art, or architecture will welcome this interpretation of symbolic realism within the mid-Victorian world. **Architectural Design, Architectural Theory, History, and Criticism, Human Behavior, Professional Practice, Special Topics, Urban Design Theory and History**
