Liste Mondiale Des Périodiques Spécialisés Dans Les Sciences Sociales ,1991      *Durkheim and the Birth of Economic Sociology* Philippe Steiner,2024-05-14 An illuminating account of the development of Durkheim s economic sociology mile Durkheim s work has traditionally been viewed as a part of sociology removed from economics Rectifying this perception *Durkheim and the Birth of Economic Sociology* is the first book to provide an in depth look at the contributions made to economic sociology by Durkheim and his followers Philippe Steiner demonstrates the relevance of economic factors to sociology and shows how the Durkheimians inform today s economic systems Steiner argues that there are two stages in Durkheim s approach to the economy a sociological critique of political economy and a sociology of economic knowledge In his early works Durkheim critiques economists and their categories and tries to analyze the division of labor from a social rather than economic perspective From the mid 1890s onward Durkheim s preoccupations shifted to questions of religion and the sociology of knowledge Durkheim s disciples such as Maurice Halbwachs and Fran ois Simiand synthesized and elaborated on Durkheim s first stage arguments while his ideas on religion and the economy were taken up by Marcel Mauss Steiner indicates that the ways in which the Durkheimians rooted the sociology of economic knowledge in the educational system allows for an invaluable perspective on the role of economics in modern society similar to the perspective offered by Max Weber s work Recognizing the power of the Durkheimian approach *Durkheim and the Birth of Economic Sociology* assesses the effect of this important thinker and his successors on one of the most active fields in contemporary sociology

homeopathic dilutions even beyond the Avogadro number All presented models are classified and their interpretation is possible either in the mechanistic paradigm or in an information paradigm This new field of research introduces new scientific concepts which are supported by experimental results Furthermore this nascent science is totally concerned with living organisms and as such it becomes necessary to define information brought by non molecular high dilutions This book presents brain storming work of this research group and is one of the starting points of a scientific evolution

**Information Sur Les Sciences Sociales** International Social Science Council,2004      Evaluative Semantics

Jean-Pierre Malrieu,2002-01-08 Evaluation from connotations to complex judgements of value is probably the most neglected dimension of meaning Calling for a new understanding of truth and value this book is a comprehensive study of evaluation in natural language at lexical syntactic and discursive levels Jean Pierre Malrieu explores the cognitive foundations of evaluation and uses connectionist networks to model evaluative processes He takes into account the social dimension of evaluation showing that ideological contexts account for evaluative variability A discussion of compositionality and opacity leads to the argument that a semantics of evaluation has some key advantages over truth conditional semantics and as an example Malrieu applies his evaluative semantics to a complex Shakespeare text His connectionist model yields a mathematical estimation of the consistency of text with ideology and is particularly useful in the identification of subtle rhetorical devices such as irony      Heritage Tourism Destinations Maria D Alvarez,Atila Yuksel, Frank Go,2016-05-27

Heritage tourism is tied to myth making and stories creative content that can be shared stored combined and manipulated but that depends on a unique cultural or natural history A significant section of the wider phenomenon that is cultural tourism heritage tourism is a demand driven industry that continues to be a subject of heated debate in academic circles Beginning with an overview of the subject this book considers the conservation and revitalization of heritage destinations as well as the role local communities have in supporting an attraction It then discusses product development and communication around the world using new techniques such as social media and examples from food tourism and sporting events before a final section reviews the planning and institutionalisation of heritage spaces A timely conclusion subsequently considers the implications of developments such as globalisation technological improvement and climate change upon these unique destinations A valuable addition to the literature this book is the first to bridge the gap between theory and practice including the latest research and international case studies for researchers and practitioners in tourism and destination management      *Impending Challenges to Penal Moderation in France and Germany* Kirstin

Drenkhahn,Fabien Jobard,Tobias Singelnstein,2023-07-27 This book investigates the penal culture in France and Germany how it is shaped in politics media and public opinion Although compared with the US or the UK France and Germany seem to place a strong emphasis on the ideal of rehabilitation that would block excessive punishment and other outcomes of punitive developments in society there is a steady increase in punitiveness over time for which the term strained restraint is proposed

The book shows that the idea of penal moderation is deeply rooted in public opinion politics and the media and that it is renegotiated every day in a dynamic interplay between these spheres Punishment and society research has traditionally focused on the US and the UK In comparative research both are considered extreme in punitive developments with high rates of imprisonment and large groups of the population under penal control The other extreme in comparative research would be Scandinavia with the famous Nordic Exceptionalism marked by low prison population rates Germany and France are often considered to be the same when compared with each other and the other with reference to both of these extremes However this book shows that France and Germany are far from being the same when it comes to state organization centralistic vs federal criminal justice and the criminal law political traditions and the media Also research from both countries has looked at whether developments such as the punitive turn have occurred in Germany and France Research focused on the domestic situation concludes that punitiveness is on the rise and that both countries are indeed experiencing their own punitive turn How do we reconcile these contradictory findings Why do these two seem to follow the path of penal moderation in the overall outcome of punishment in society when we look at comparative research And how is it that from a domestic perspective punitive attitudes and desires are leading to more punitiveness By focusing on the meso level with a comparative perspective on the two countries and a dynamic analytical approach this book reconciles the fluidity of individual attitudes and opinions with the relative stability of societal discourse The authors posit that penal moderation comes at a price overall and in an internationally comparative perspective there is penal moderation but a closer look at the domestic situation and development reveals that it is nonetheless challenged by a slowly rising tide of punitiveness Going beyond the main tenets of punishment and society research with a dynamic analysis of two large societies in Europe this book is ideal reading for scholars and students of penology criminal justice and European studies      Essentials of Functional Phonology Tsutomu Akamatsu, 1992 Peeters 1992

**Social Morphogenesis** Margaret S. Archer, 2013-02-20 The rate of social change has speeded up in the last three decades but how do we explain this This volume ventures what the generative mechanism is that produces such rapid change and discusses how this differs from late Modernity Contributors examine if an intensification of morphogenesis positive feedback that results in a change in social form and a corresponding reduction in morphostasis negative feedback that restores or reproduces the form of the social order best captures the process involved This volume resists proclaiming a new social formation as so many books written by empiricists have done by extrapolating from empirical data Until we can convincingly demonstrate that a new generative mechanism is at work it is premature to argue what accounts for the global changes that are taking place and where they will lead More concisely we seek to answer the question whether or not current social change can be regarded as social morphogenesis Only then in the next volumes will the same team of authors be able to remove the question mark

**Social Innovation and Sustainability Transition** Geoff Desa, Xiangping Jia, 2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co-learning relationships between Land Grant Universities and their diverse local constituencies The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state's residents Extension systems

continue to offer a front door to a major public university in almost every county of the United States but they tend to be viewed primarily as a way to translate science or distribute information from the university to the public This books argues for the importance of Extension and shows that we are conceiving of this system too narrowly Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two way relationships with their local constituents in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies Chapter Palatable disruption the politics of plant milk chapter Feeding the melting pot inclusive strategies for the multi ethnic city chapter A carrot isn t a carrot isn t a carrot tracing value in alternative practices of food exchange chapter Virtualizing the good life reworking narratives of agrarianism and the rural idyll in a computer game and chapter Workable utopias for social change through inclusion and empowerment Community supported agriculture CSA in Wales as social innovation are available open access under a Creative Commons Attribution 4 0 International license via link [springer.com](https://www.springer.com) **Ibss: Political Science: 1997** British Library of Political and Economic Science,1999-01-14 Provides an unrivalled overview of intellectual development in political science
