Rationing Medicine:

Rationing Medicine Robert H. Blank, 1989-11-17 **Rationing Medicine** Eric Matthews, Elizabeth Russell, 2018-10-08 **Rationing Medical Care on the Basis of Age** Eric Matthews, Elizabeth Russell, 2018-10-08 **Rationing Medical Care on the Basis of Age** explores this highly topical issue and presents a critical argument on the nature of the possible crisis. Its in-depth philosophical analysis of the main ethical positions adopts an interdisciplinary and international approach. This book is important reading for healthcare policy makers and shapers and healthcare managers. Academics in ethics, philosophy, economics, and all healthcare disciplines will find it useful, as will public health specialists, health economists, and social scientists with an interest in health and medicine. The authors of this book have opened up significant new perspectives on many important issues which in practice confront politicians, managers, professionals, patients, and the public today. They have done this moreover in a way that is highly accessible to a non-specialist readership. *Rationing and Resource Allocation in Healthcare* Ezekiel Emanuel, Harald Schmidt, Andrew Steinmetz, 2018-05-10 **Rationing and Resource Allocation in Healthcare** Essential Readings provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions. The volume is divided into three broad sections: Conceptual Distinctions and Ethical Theory, Rationing and Resource Allocation. Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources, this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences, philosophy, law, and medical ethics. **Choosing Who's to Live** James William Walters, 1996 The population is rapidly aging while access to proper and affordable medical treatment is becoming more and more limited. This impasse challenges us to make ethical decisions regarding the rationing of health care. Arguing that de facto rationing is already taking place due to economic necessity and that proper management of this rationing is essential to the fair and ethical treatment of all seeking care, **Choosing Who's to Live** directly addresses one of the most challenging moral questions of our day. Appearing in the wake of increasing awareness of health care reform, this volume identifies four compelling arguments for managed health care rationing: the number of citizens over age eighty-five will increase 500 percent by the year 2040; current baby boomers could live longer than today's elderly by seven to fifteen years; new medical technologies are appearing every day and the ratio of workers to retirees will be 1.4 in forty years instead of the current 1.25. In this volume, six leading scholars take the discussion of rationing health care beyond the simple idea of withholding government-funded life-saving treatment from the very old to a more ethical, effective treatment plan for all. **Exposing the Twenty Medical Myths** Arthur Garson Jr., Ryan Holeywell, 2019-10-22 Despite intense political focus and debate for the past 10 years, Americans remain deeply worried about the availability and affordability of health care for themselves and their families. In clear and accessible prose, journalist Ryan Holeywell and medical doctor and health policy expert Arthur Garson provide Americans with the tools we need to have

an honest unbiased view of the state of health care policy in America By fact checking 20 enduring health care myths they move the debate beyond Obamacare v repeal and replace and give citizens the tools they need to evaluate the major policy issues confronting our health care system *Library of Congress Subject Headings* Library of Congress, Library of Congress. Subcommittee on Antitrust and Monopoly, 1974 The Price of Life Robert H. Blank, 1997-02-14 How can America become a healthy nation Blank asks when it is beset by poverty illiteracy and crime No new health care system can succeed unless or until the links between social problems and sickness are understood and addressed On the national level Blank calls for a more aggressive redistribution of social and public health resources to the poor and elderly at the same time he describes sanctions that would encourage individuals to be more careful about their own health and limit or change destructive behavior **Health Care Reform and the Law in Canada** Timothy Caulfield, Barbara von Tigerstrom, 2002 Sweeping changes are being proposed as Canadians examine our health care system But what are the legal implications of health care reform In this timely collection lawyers and legal scholars discuss a variety of topics in health care reform including regulation of private care interpretation of the Canada Health Act and the constitutional implications of proposed reforms Barbara von Tigerstrom is currently studying at the University of Cambridge in England Timothy Caulfield lives in Edmonton where he teaches at the University of Alberta *Future Survey Annual 1992* Michael Marien, 1993-01-30 **The Sociology of Health and Illness** Peter Conrad, 2005 This collection of 49 readings offers an integrated analysis of the most important issues regarding health and health care from a critical and sociological perspective Substantive introductions provide context for the readings With ten new and two revised essays the Seventh Edition contains more coverage of key areas such as alternative medicine the pharmaceutical industry and the relationship between healthcare and politics **Comparative Health Policy** Robert H. Caplan, Robert H. Blank, Janna C. Merrick, 2012-12-06 In April 1982 an infant boy was born in Bloomington Indiana with Down syndrome and a defective but surgically correctable esophagus His parents refused to consent to surgery or intravenous feeding The hospital unsuccessfully sought a court order to force treatment and appeals to higher courts also failed The child identified as Baby Doe by the news media subsequently died The events in Bloomington became the catalyst for action by the Reagan

administration the courts and Congress that culminated in a federal policy that makes failure to treat newborns with disabilities a form of child neglect This book centers on the public policy aspects of withholding treatment from critically ill newborns who are disabled Specifically it deals with why the policy was enacted and what impact it has had on health care workers families and infants Some of the contributors to this book spearheaded the early debate on withholding treatment Anthony Shaw s New York Times Magazine article in 1972 was the first to address these issues in the popular press The following year he published a related article in the New England Journal of Medicine Also appearing in this same issue of NEJM was the pathbreaking study coauthored by A G M Campbell on withholding treatment in the special care nursery at Yale New Haven Hospital Each of these articles promoted much public and professional discussion *Key Concepts and Issues in Nursing Ethics* P.
