Shelley,2017-11-10 Global History of Philosophy John C. Plott,1989-01-01 The fourth and fifth volumes of the Global History of Philosophy are designated The Period of Scholasticism in order to stress that the scholastic method with its emphasis on thesis antithesis and attempts at synthesis became universal throughout Eurasia Scholasticism should not be taken in the pejorative sense as the juggling of arguments by straw men but in the sense of a challenge even in our own era to work for consistent and comprehensive systematic synthesis All the older traditions need to be reinterpreted in terms of modern conditions which after all is what the Eurasian scholastics of these centuries were doing for their own time The major developments of this period are Monism in Many Moods during the ninth century through Exfoliation and Elaboration of those seminal systems in the tenth and eleventh centuries until the time of the Great Summas in the twelfth and thirteenth centuries It was during this time that philosophy and theology developed a very highly sophisticated technique of balancing arguments and refutations and counter arguments and counter refutations As is true of the whole series these volumes are a new way of exploring the accumulative wisdom of mankind and in the process explode many of the ethnocentric stereotypes which still hinder intercultural communications and world peace through intercultural understanding A HISTORY OF SPAIN FROM THE EARLIEST TIMES TO THE DEATH OF FERDINAND THE CATHOLIC ULICK RALPH BURKE,1900 **A history of Spain ... to the death of Ferdinand the Catholic** Ulick Ralph Burke,1900 **Nicholas of Cusa and Islam** Ian Christopher Levy,Rita George-Tvrtković,Donald Duclow,2014-06-26 To explore Christian Muslim relations at the dawn of the modern age this book examines Nicholas of Cusa's seminal works on the Qur'an and world religions It also considers Muslim responses to Christianity and other Christian writings on Islam **Light in the Dark Places** Augustus Neander, *Northrop Frye's Student Essays, 1932-1938* Northrop Frye,2014-05-01 Frye was a person of uncommon gifts and very little that came from his pen is without interest So writes Robert Denham in his introduction to this unique collection of twenty two papers written by Northrop Frye during his student years Made public only after Frye's death in 1991 all but one of the essays are published here for the first time The majority of these papers were written for courses at Emmanuel College the theology school of Victoria College at the University of Toronto Essays such as The Concept of Sacrifice The Fertility Cults and The Jewish Background of the New Testament reveal the links between Frye's early research in theology and the form and content of his later criticism It is clear that even as a theology student Frye's first impulse was always that of the cultural critic The papers on Calvin Eliot Chaucer Wyndham Lewis and on the forms of prose fiction show Frye as precociously witty rigorous and incisive a gifted writer who clearly found his voice before his last undergraduate year David Lodge wrote in the New Statesman There are not many critics whose twenty year old book reviews one can read with pleasure and instruction but Frye is an exception to most rules Northrop Frye's student essays provide pleasure and instruction through their comments on the Augustinian view of history on beauty truth and goodness on literary symbolism and tradition **The Dodecahedron** Paul Glennon,2005 Twelve narratives twelve narrators twelve genres and twelve

fictional worlds collide to spectacular effect in Paul Glennon's *The Dodecahedron or a Frame for Frames* The second book from the author of *How Did You Sleep* takes his adventures in short fiction to strange new regions where professional polygamists heretical alcoholics and hallucinating arctic explorers find themselves sharing plot points character traits and dialogue At turns philosophical and farcical *The Dodecahedron* makes for intriguing compelling reading Each of the book's twelve chapters has its own style and apparent fictional autonomy but every narrative finds itself corroborated or undermined by the next Messages found in bottles computer generated dialogues and the lamentations of the world's last genie shouldn't have much in common but their paths constantly intersect in *The Dodecahedron* creating networks of allusions and contradictions *The Dodecahedron* revels in the art of story making and proves once and for all that the geometry of the dodecahedron is a rich source of comic fiction

Work in Ancient and Medieval Thought

B. van de Hoven, 2023-01-16 The main object of this study is to find out whether the differences between classical and medieval thinking about work occupations and technology are so significant that we are justified in speaking of a real break between Antiquity and the Middle Ages in this connection or whether there is a possible continuity of ideas From a comparative perspective five themes are being researched to shed light on this question In the first two chapters the author looks into the traditional view of negative ideas about work in Antiquity Chapter three subsequently deals with monks and their attitude towards labour In chapter four the place of the so called *artes mechanicae* in medieval classifications of knowledge is being studied In chapter five we find an analysis of twelfth century sermons *ad status* These three chapters principally deal with the question whether Christianity brought about a change in attitude towards work
