Criminal Justice Philip P. Purpura, 1996. *Criminal Justice: An Introduction* is a complete introductory text for the most basic and widely studied course in this subject area. Each chapter begins with behavioral objectives and a list of key terms. A variety of strategies are designed into the text to hold the attention of the reader: key terms in bold lettering, side margin notes containing interesting facts and challenging questions, boxed justice events and international perspectives, and over 80 photographs, tables, and figures. Each chapter ends with applications that enable the student to apply the material to real-life situations. This text competes with larger books by offering a complete but succinct and less expensive introduction to criminal justice, which will be more manageable for community colleges and colleges with shorter terms. The instructor's manual will assist educators with special projects and test questions and answers. The accompanying disk challenges students with interactive exercises. An excellent entry-level textbook for undergraduate criminal justice students. Written by an instructor of criminal justice and security for over 20 years. Includes an instructor's manual and a disk with interactive exercises for students.

Working with Giants John Norman, 2021-07-08. John Norman, author of the best-selling *Fire Officer's Handbook of Tactics*, brings his own remarkable story to life in this new highly anticipated memoir. But this is a story about all firefighters, the men and women who are absolutely the salt of the earth, whose sole mission is to protect the lives and property of their neighbors. This book celebrates the lives of firefighters, a truly special group of people, and reintroduces them to the American public. What is a hero? A hero is a role model. To be a hero means protecting others at great personal risk because it's the right thing to do. Since September 11, 2001, Norman writes, people have been speaking about firefighters as America's Heroes. I truly believe they are heroes in the classical sense of the word. Renowned for combining compelling storytelling with industry-standard tactical training, Norman offers an unparalleled look into the modern history of America's fire service from a front-row seat. This is a celebration of the best in public service, its sacrifices and triumphs, and the people who were there who will insist with uncommon humility: I was just doing my job.

Unemployment's Shocking Truth Jack Stone, 2008-06-03. *About the Book* This book does not take a neutral stand on the issue of mass unemployment. It is an effort to expose capitalism's most outrageous feature: its compulsive need to use unemployment and the fear of unemployment to ensure the docility and subservience of its workers. Under the capitalist system, the stick of the fear of unemployment is necessary to keep workers' noses to the grindstone and make them perform to the satisfaction of their employers. The stick is needed because much work is boring; the carrot paid is less than a living wage.

provides workers very little or no control over the work process and stifles creativity in short because the total carrot offered to numerous workers is so woefully inadequate Under a different system one in which working people participated fully in the decisions affecting what how and for what purpose goods and services were produced if we had a system based on economic democracy there would be no need to use the stick of the fear of unemployment The creativity of most of the millions of working people now mostly dormant would be awakened and the volume and quality of improvements and inventions especially in housing energy transit systems and health care would be so great as to tower high above and completely overshadow the number and purpose of the innovations created under the present system The issue of unemployment is shrouded in half truths and outright lies As a result there is almost total ignorance about the real causes of unemployment and worse still about its very serious consequences Many claim that there are enough jobs but that the unemployed are lazy and would rather be on welfare While this may be true of a very small fraction of the unemployed it is not true of the overwhelming majority There have been numerous instances in which whenever advertisements calling for applicants for relatively well paid jobs or for jobs that paid better than the minimum wage the number of applicants that applied for those jobs were ten or more times greater than the number of jobs that were advertised In September 26th of 1984 to mention just one instance the Associated Press News Agency reported that 50 000 people lined up for 350 jobs The report went on to say that the applicants some of whom waited in line for two days hope to land a longshoreman s job paying 15 45 an hour or a marine clerk s job earning 17 45 an hour However the fact that only 350 jobs are currently available didn t dismay the crowd which queued up in a line in the San Pedro district of Los Angeles that stretched for 13 mile Clearly the majority would rather have gainful employment at a living wage and live a life of dignity and integrity Furthermore apart from the simple need to earn a living productive employment is an indispensable part of the psychological makeup of human beings Simply put people want to feel useful Prolonged joblessness is a serious threat to a person s self esteem and destroying that self esteem has appalling consequences The ugly truth is that the system under which we live will not or cannot provide jobs for those who need them The business class is simply not interested in full employment because mass unemployment provides them with many benefits Among those benefits a large pool of unemployed workers drives down the wages employers have to pay

Ireland and Greece Africa Australia North America Antarctica and much more Adventures to the World's Hidden Corners chronicles the lifelong quest of an architect and his wife as they embarked on an odyssey to the world's most intriguing and out of the way places *The Surgical Clinics of Chicago* ,1917 *Measuring Prison Performance* Gerald G. Gaes,2004 This book provides approaches and tools to measure prison performance particularly in the context of analyzing public versus private management of prisons The authors argue that prison performance must be measured in reference to the goals of a particular prison system and introduce the technique of multilevel modeling to allow for simultaneous measurement of the individual and the institution They also show how their analytic framework can be applied to other criminal justice components such as prosecution adjudication post release supervision and policing Further they argue their framework can be used to evaluate the privatization of almost any publicly administered service They contend that the ability to meaningfully compare public and private prisons can better inform penal policy and improve prison performance and accountability *Geography of Home* Akiko Busch,2003-07 Geography Of Home is a meditative tour of the home Busch looks at the emotional attachments we have to a house and the way those attachments change with time and technology
