**Emotions** Kevin Sludds, 2009 In this study of emotions and moods the author discusses both analytic and continental traditions of philosophy He starts by examining critically the influential hybrid cognitive theory in particular William Lyons's causal evaluative theory describing its merits but also elucidating a number of fundamental defects that exist in this account He goes on to detail Martin Heidegger's description of mood in *Being and Time* as pre-cognitive and pre-moral defending it from those who attempt to attribute a cognitive dimension to it The book highlights the significance of connections or bonds in our affective lives at the ontic as well as ontological levels by examining three specific emotions grief guilt and objectless fear One of the study's principal achievements is the demonstration that there is much to be gained from both the analytic and continental traditions of philosophy in furthering our understanding of emotion and mood analysis In particular it shows how our understanding of guilt and objectless fear can be deepened when assessed in Heideggerian terms
