## **Re Imagine Your Business For Breakthrough Results:**

Re-imagine Your Business for Breakthrough Results Bruce Abell, 2002 Business successes and failures can almost always be traced to the quality of their fundamental ideas and how they are used in the company Ideas are always fresh when a business starts but when they become stale when they fail to reflect the changes in the world then the business withers and eventually dies This is a practical book about business ideas and complexity Complexity is a new science that shows how interactions among individuals environments chance events and evolution produce the variety and unpredictable outcomes of the world In a sense it is the science of real world messy systems Human organizations and businesses are the messiest systems Traditionally to manage them we've been able to make them less messy and more predictable But today the world no longer cooperates Now cultures markets and technologies change so fast that businesses must be more adaptive than they had to be in more predictable times Human organizations are different from all other adaptive systems because they have at their cores ideas not DNA They are driven by explicit goals and intentions not just survival and reproduction and the organization is the way they pursue the goals Unique ideas give each human complex system a unique identity and those ideas are the glue that holds it together The book includes a set of diagnostics for emergent strategies that enable any organization to assess and improve the quality and use of its ideas These diagnostics along with over 100 examples show how to rethink business purposes to identify sources of confusion or poor performance to consider options that older mindsets have closed off to make decisions and most importantly to alter the perspective of your company for markedly better results

**The Business of Possibility** John A. Wood,2023-06-20 The Business of

Possibility reveals the potential we hold to create a paradigm shift in organisations. It gets to the heart of the matter in what makes any organisation for profit or not for profit rise above the many. It may be the first truly ground breaking work since the book by Peters and Waterman *In Search of Excellence* almost 40 years ago. This is a guide. It points to and explains the shift organisational leaders and the influential must make to create thriving and thus sustainable organisations. That is if they want to both survive and thrive in this new world we have created. It demands that you take your own journey of deepening or re-discovering your innate transformative state, your unique state of Possibility. Seeing Possibility is the superhighway we travel along when seeing and manifesting any transformative idea. It leads to a transformed life and relationships; this critical ingredient is exposed in transforming your life and relationships, the pathway to transform organisations. In this guide, John recounts instances from his life of seeing Possibility, the impact these instances had on his business as well as on the lives of many of his colleagues and clients. He explains how you too can see Possibility, what it might and might not be, the benefit of letting go of thinking you know the truth of anything, the freedom that seeing Possibility can give you and how, when seen, it can re-cast how you see life and re-shape your communications, relationships, business, family and vocational life for your own benefit and for the benefit of the common good. In seeing Possibility, you like John can see a world in which we are kind and understanding towards one another, where a sense of fairness and decency govern all our decisions at work and at play. A world in which wisdom and common sense prevail as reality, not simply in the realm of a wistful idea. The business of possibility guides you on a journey that will benefit all of us.
