Policing Sexual Assault Jeanne Gregory, Sue Lees, 2012-12-06 Policing Sexual Assault provides a detailed account of current police practice in the UK in response to sexual assault. The authors use case studies and interviews to find out why when the number of rape cases has almost trebled since 1985 the proportion of cases resulting in a conviction has dropped from 24% to 8.6%. Chapters cover an overview of existing research, police culture, police recording practices, the role of the Crime Prosecution Service, male rape, analysis of the judicial process, interviews with complainants and first hand accounts of their experiences, proposals for reform. The authors place their findings within the context of theoretical debates about domestic and sexual violence and examine the gap between official condemnations of male violence as enshrined in law and the realities of the victims' male and female experiences whereby the violence is too often condoned.

Rabble in Arms Kenneth Roberts, 2012-09-12 The second of Roberts's epic novels of the American Revolution, *Rabble in Arms*, was hailed by one critic as the greatest historical novel written about America upon its publication in 1933. Love, treachery, ambition, and idealism motivate an unforgettable cast of characters in a magnificent novel renowned not only for the beauty and horror of its story but also for its historical accuracy.

The History of England (Complete) David Hume, 2020-09-28 The curiosity entertained by all civilized nations of inquiring into the exploits and adventures of their ancestors commonly excites a regret that the history of remote ages should always be so much involved in obscurity, uncertainty, and contradiction. Ingenious men, possessed of leisure, are apt to push their researches beyond the period in which literary monuments are framed or preserved, without reflecting that the history of past events is immediately lost or disfigured when intrusted to memory or oral tradition, and that the adventures of barbarous nations, even if they were recorded, could afford little or no entertainment to men born in a more cultivated age. The convulsions of a civilized state usually compose the most instructive and most interesting part of its history, but the sudden, violent, and unprepared revolutions incident to barbarians are so much guided by caprice and terminate so often in cruelty that they disgust us by the uniformity of their appearance, and it is rather fortunate for letters that they are buried in silence and oblivion. The only certain means by which nations can indulge their curiosity in researches concerning their remote origin is to consider the language, manners, and customs of their ancestors and to compare them with those of the neighbouring nations. The fables which are commonly employed to supply the place of true history ought entirely to be disregarded, or if any exception be admitted to this general rule, it can only be in favour of the ancient Grecian fictions which are so celebrated and so agreeable that they will ever be the objects of the attention of mankind. Neglecting therefore all traditions or rather tales concerning the more early history of Britain, we shall only consider the state of the inhabitants as it appeared to the Romans on their invasion of this country; we shall briefly run over the events which attended the conquest made by that empire, as belonging more to Roman than British story; we shall hasten through the obscure and uninteresting period of Saxon annals, and shall reserve a more full narration for those times when the truth is both so well ascertained and so complete as to promise entertainment and instruction to the reader. All ancient writers agree in

representing the first inhabitants of Britain as a tribe of the Gauls or Celtae who peopled that island from the neighbouring continent Their language was the same their manners their government their superstition varied only by those small differences which time or communication with the bordering nations must necessarily introduce The inhabitants of Gaul especially in those parts which lie contiguous to Italy had acquired from a commerce with their southern neighbours some refinement in the arts which gradually diffused themselves northwards and spread but a very faint light over this island The Greek and Roman navigators or merchants for there were scarcely any other travellers in those ages brought back the most shocking accounts of the ferocity of the people which they magnified as usual in order to excite the admiration of their countrymen The south east parts however of Britain had already before the age of Caesar made the first and most requisite step towards a civil settlement and the Britons by tillage and agriculture had there increased to a great multitude a The other inhabitants of the island still maintained themselves by pasture they were clothed with skins of beasts They dwelt in huts which they reared in the forests and marshes with which the country was covered they shifted easily their habitation when actuated either by the hopes of plunder or the fear of an enemy the convenience of feeding their cattle was even a sufficient motive for removing their seats and as they were ignorant of all the refinements of life their wants and their possessions were equally scanty and limited
