All over the world, animals are becoming endangered. If an animal is endangered that means few animals of that species remain. If endangered animals are not protected, they sometimes become extinct.

Why are animals becoming endangered? Some animals are endangered **because of** poaching. Poaching is the illegal hunting of animals. In Africa, elephants are endangered because poachers kill elephants to get ivory. The ivory is very valuable.

Some animals are endangered **due to** pollution. In Asia, many river dolphins are endangered because humans dump waste water into the rivers. The waste water kills fish that dolphins eat and makes the dolphins sick.
