Reading At Risk:

Reading at Risk, 2004 Reading at Risk National Endowment National Endowment for the Arts, 2015-12-31 Reading at Risk presents the results from the literature segment of a large scale survey the Survey of Public Participation in the Arts conducted by the Census Bureau in 2002 at the request of the National Endowment for the Arts This survey investigated the percentage and number of adults age 18 and over who attended artistic performances visited museums watched broadcasts of arts programs or read literature The survey sample numbered more than 17 000 individuals which makes it one of the most comprehensive polls of art and literature consumption ever conducted Reading at Risk extrapolates and interprets data on literary reading and compares them with results from similar surveys carried out in 1982 and 1992 The survey asked respondents if during the previous twelve months they had read any novels short stories plays or poetry in their leisure time not for work or school The report establishes trends in the number of adults reading listening to and writing literature by demographic categories of age race region income and education This report also compares participation in literary activities with other leisure activities such as watching movies and exercising Reading at Risk provides an invaluable snapshot of the role of literature in the lives of Americans It comes at a critical time when electronic media are becoming the dominant influence in young people s worlds Reading at Risk adds new and distressing information to the discussion It contains solid evidence of the declining importance of literature to our populace Literature reading is fading as a meaningful activity especially among younger people If one believes that active and engaged readers lead richer intellectual lives than non readers and that a well read citizenry is essential to a vibrant democracy the decline of literary reading calls for serious action Reading at Risk Kelly Hill, Dana Gioia, 2004-10 *Resources in Education* , 1998 Calculating Political Risk Catherine Althaus, 2013-11-26 Calculating Political Risk is rich and illuminating and much more than a political science treatise Althaus draws on diverse literature extensive interviews and intriguing case studies to offer interdisciplinary practical and nuanced insight This book provides new perspectives and more precise language for making sense of a critical dimension of politics policy making and public management Evert Lindquist Director and Professor School of Public Administration University of Victoria Canada This powerful new book is the first ever examination of the hard edge of how political risk something faced by all political actors innumerable times every day is calculated and used in decision making It opens with an outline of the historical and linguistic origins of risk the various disciplinary understandings of risk the risk society concept and how risk has come to be so prominent in the context of environmental disaster and terrorism The book then defines political risk and looks at its manifestations in the public sector from project to high level political risk It also looks at risk identification versus risk management and compares the concept of political risk with the private sector practice of risk management Unique research findings from interviews with over 100 risk practitioners and politicians provide a detailed look at how political actors calculate political risk Case study based chapters look in depth at neat and discrete

examples risk calculation in state development plans in Australia political risk identification and management in the UK during the mad cow crisis and US government risk calculation in the post September 11 context The final chapters draw together the experiences and lessons learned from the case studies and practitioner insights to formulate a better understanding of what political risk is and what its calculation means in political practice The author shows how political risk calculation provides a fresh perspective on policy analysis and identifies how political risk is relevant to a broader understanding of politics and political science as well as policy formulation and implementation on the ground

Reading and Writing Disability Differently Tanya Titchkosky, 2007-05-05 Mixing rigorous social theory with concrete analysis Reading and Writing Disability Differently unpacks the marginality of disabled people by addressing how the meaning of our bodily existence is configured in everyday literate society Tanya Titchkosky begins by illustrating how news media and policy texts reveal dominant Western ways of constituting the meaning of people and the meaning of problems as they relate to our understandings of the embodied self Her goal is to configure disability as something more than a problem and beyond simply a positive or a negative and to treat texts on disability as potential sites to examine neo liberal culture Titchkosky holds that through an exploration of the potential behind limited representations of disability we can relate to disability as a meaningful form of resistance to the restricted normative order of contemporary embodiment Incorporating a textual analysis of ordinary

depictions of disability this innovative study promises to represent embodied differences in new ways and alter our imaginative relations to the politics of the body
