Decolonizing Western-Indigenous Dialogues Karsten Kiewitt, Ronald Lutz, Gregory Cajete, Maria do Carmo dos Santos Gonçalves, Dithake Kefilwe Johanna, 2025-09-04 This groundbreaking book offers a unique collection of Indigenous and non Indigenous approaches to decolonizing international development The world is facing enormous challenges from ever growing global inequality to climate change to the continuing fallout from the Covid pandemic It is becoming increasingly clear that the origin of these challenges lies in the economic models and imperial lifestyles perpetuated by the Global North In order to find new answers to the world s biggest challenges then it is necessary for the Global North to acknowledge Indigenous knowledge systems as unique and legitimate epistemologies and to engage in dialogues with them This collection brings together contributions from Indigenous and non Indigenous authors to promote that dialogue It provides a unique rare forum for discourse between the expressive potentials of differing world views and ultimately for developing cooperation in the terms of Eisenstein s notion of interbeing which counteracts the History of Separation between nature and culture and between Global South and Global North What emerges is a path forward towards a new interwoven modernity characterized by an embrace of separate but mutually constitutive ways of knowing For its wide topical and geographic breadth and for its bringing together of Indigenous and non Indigenous scholars around the world this book is a must read for researchers and students interested in indigenous studies and decolonial approaches to international development **The Elgar**

Companion to Marxist Economics Ben Fine, Alfredo Saad-Filho, Marco Boffo, 2012-01-01 This Companion takes stock of the trajectory achievements shortcomings and prospects of Marxist political economy It reflects the contributors shared commitment to bringing the methods theories and concepts of Marx himself to bear across a wide range of topics and perspectives and it provides a testimony to the continuing purpose and vitality of Marxist political economy As a whole this volume analyzes Marxist political economy in three areas the critique of mainstream economics in all of its versions the

critical presence of Marxist political economy within and its influence upon each of the social science disciplines and cutting across these the analysis of specific topics that straddle disciplinary boundaries Some of the contributions offer an exposition of basic concepts accessible to the general reader laying out Marx's own contribution its significance and subsequent positions and debates with and within Marxist political economy The authors offer assessments of historical developments to and within capitalism and of its current character and prospects Other chapters adopt a mirror image approach of pinpointing the conditions of contemporary capitalism as a way of interrogating the continuing salience of Marxist analysis This volume will inform and inspire a new generation of students and scholars to become familiar with Marxist political economy from an enlightened and unprejudiced position and to use their knowledge as both a resource and gateway to future study

Intangible Flow Theory in Economics Tiago Cardao-Pito, 2020-12-13 The dominant economic explanations of the 20th century are not comprehensive enough to describe the complexity of economy and society and their reliance on the biosphere *Intangible Flow Theory in Economics* Human Participation in Economic and Societal Production outlines a new theory that challenges both economics and the relativism conveyed in social constructivism poststructuralism and postmodernism To mainstream economics and Marxism monetary flows transform us humans into commodities To this new theory flows of economic elements as physical goods or money are consummated by intangible flows that cannot yet be precisely appraised at an actual or approximate value for instance workflows service flows information flows or communicational flows The theory suggests a systematic alternative to refute the human commodity framework and interrelated conjectures e.g. human capital human resources human assets Furthermore it exhibits that economic and societal production is fully integrated on the biosphere Conversely contemporary relativism argues for the end of theory development suspension of evidence and entrenchment of knowledge validity among local systems named as paradigms epistemes research programs truth regimes or other terms Thus relativism tacitly supports dominant theories as the human commodity framework because it preventively sabotages the creation of new theoretical explanations Disputing relativist theses intangible flow theory demonstrates that innovative theoretical explanations remain possible This book is of significant interest to students and scholars of political economy economic sociology organization economics and social theory

The SAGE Handbook of Social Geographies Susan Smith, 2010 With clarity and confidence this vibrant volume summons up the social in geography in ways that will excite students and scholars alike Here the social is populated not only by society but by culture nature economy and politics Kay Anderson University of Western Sydney This is a remarkable collection full of intellectual gems It not only summarises the field of social geography and restates its importance but also produces a manifesto for how the field should look in the future Nigel Thrift Vice Chancellor University of Warwick The book aims to be accessible to students and specialists alike Its success lies in emphasizing the crossovers between geography and social studies The good editorial work is evident and the participating contributors are well established scholars in their respective fields Miron M Denan Geography Research Forum An excellent handbook that will attract a diversity of readers It will inspire undergraduate postgraduate students and stimulate lecturers researchers interested in the complexity and diversity of the social realm As the first of its kind in the sub discipline it is a book that is enjoyable to read and will definitely add value to a personal or library collection Michele Lobo New Zealand Geographer The social relations of difference from race and class to gender and inequality are at the heart of the concept of social geography This handbook reconsiders and redirects research in the discipline while examining the changing ideas of individuals and their relationship with structures of power Organised into five sections the SAGE Handbook of Social Geographies maps out the connections anchored in social geography Difference and Diversity builds on enduring ideas of the structuring of social relations and examines the ruptures and rifts and continuities and connections around social divisions Geographies and Social Economies rethinks the sociality subjectivity and placement of money markets price and value Geographies of Wellbeing builds from a foundation of work on the spaces of fear anxiety and disease towards newer concerns with geographies of health resilience and contentment Geographies of Social Justice connects ideas through an examination of the possibilities and practicalities of normative theory and frames the central notion of Social geography that things always could and should be different Doing Social Geography is not exploring the how to of research but rather the entanglement of it with practicalities moralities and politics This will be an essential resource for academics researchers practitioners and postgraduates across human geography

Swarming Landscapes Rob Roggema, 2012-12-02 This book advocates a fresh approach to planning that anticipates rather than reacts to the changes in climate currently in process Today s spatial planning procedures rely on historical evidence instead of preparing for factors that by definition lie in the future yet which

are relatively uncontroversial shortages of water sea level rise and rises in average temperatures being but three examples Arguing for more flexibility the contributors view complexity as the key to transforming the way we plan in order to better equip us to face uncertainties about our future environment Geographies of Difference, Indifference and Mis-difference Antonio Augusto Rossotto Ioris, 2024-10-17 World renowned scholar of human geography development and environmental change Antonio Ioris presents an original reconceptualisation of the notions of difference and indifference and their impacts on social structures Drawing on a wide range of philosophical debates and offering groundbreaking new insights into geographically specific trends through the lens of indigenous geographies Ioris explores how political actors use notions of difference to foster indifference for the purposes of domination which ultimately crystallizes in what he terms mis difference a calcified difficult to overcome obstacle to concord and fairness that underpins capitalist relations of property and production At the same time Ioris shows how some social actors use the concept of difference for reconciliation for overcoming indifference and mis difference and suggests how these moves can help to fight against ideologies that produce our unequal world and facilitate land grabs Ioris elucidates all of this in concrete terms through a study of the Guarani Kaiowa people in Brazil of how they have been oppressed by state sanctioned indifference and misdifference and of how they are resisting through a contestation of what difference can mean and how it can function in the contemporary world

Forthcoming Books Rose Arny, 2003-04 **Envisioning Media Power** Brett Christophers, 2009-04-16 Envisioning Media Power develops an original geographical perspective on the nature and exercise of power in the international television economy It uses theories of political economy as the basis for a comparative empirical examination of the UK and New Zealand television markets while closely considering these markets respective relationships with the US market and its globally influential media corporations In fleshing out this geographical perspective the book critically addresses the power to produce reproduce and extract profit from territorialized media markets To understand such powers the book examines processes of creation and dissemination of industry knowledge structures of industry governance and the locational characteristics of television s operational economy Through its rigorous and creative combination of conceptual insights with empirical substance Envisioning Media Power both illuminates the fabric of television s international space economy and ultimately offers a unique theoretic argument suggesting that power knowledge and geography are inseparable not only from one another but from the process of accumulation of media capital
