# REDSHIFT RENDEZVOUS

One fabulously wealthy colony. One hyperspace craft.  
One team of ruthless hijackers. One loner in their way.  
Do the math.

"This is absolutely one of the most terrific ideas  
for an SF novel I've seen in years. My first thought was,  
'Why couldn't I have come up with this?' My second thought, too."  
-- Connie Willis

Stith,2024-10-01 All life on Earth will die of thirst unless a couple of loners on the run can use a strange time machine to stop a secret project An action packed short novel from a Nebula Award nominee Meg is an angry scientist s daughter Her father is not a mad scientist just really angry so angry that he and Meg have rarely spoken since the death of her mother Meg has become a loner obsessed with combatting polluters like the ones who triggered her mother s death And her father has had a different obsession When Meg breaks into a paint company to expose their practices she runs into Josh another loner out to save the world When Meg and Josh suddenly find themselves on the run from the cops Meg heads for the one man who should always take her in her father But when Meg and

Josh reach him they find him dying Just before he dies he gives Meg a strange device that looks like a cellphone and tells her to use extreme caution When the invention proves to be the time machine that holds the key to humanity s future Meg and Josh must find a way to do the impossible to work as a team They are up against the cops a powerful billionaire a Russian profiteer and a romantic rival Can they save the world and save each other About Stith s prior work Stith writes in the best hard sf manner dropping characters into a situation that can be solved only by thought and reason but he also more modernly creates real and believable characters He is becoming one of the most eloquent modern hard sf practitioners Booklist

Slow Light Sidney Perkowitz,2011 Slow Light is a popular treatment of today s astonishing breakthroughs in the science of light Even though we don t understand light s quantum mysteries we can slow it to a stop and speed it up beyond its Einsteinian speed limit 186 000 miles sec use it for quantum telecommunications teleport it manipulate it to create invisibility and perhaps generate hydrogen fusion power with it All this is lucidly presented for non scientists who wonder about teleportation Harry Potter invisibility cloaks and other fantastic outcomes Slow Light shows how the real science and the fantasy inspire each other and projects light s incredible future Emory physicist Sidney Perkowitz discusses how we are harnessing the mysteries of light into technologies like lasers and fiber optics that are transforming our daily lives Science fiction fantasies like Harry Potter s invisibility cloak are turning into real possibilities Please click here for more info The Year's Best Science Fiction: Nineteenth Annual Collection Gardner Dozois,2002-07-22 The twenty first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed New possibilities previously unimagined appear almost daily and science fiction stories continue to explore those possibilities with delightful results Collected in this anthology are such compelling stories as On K2 with Kanakaredes by Dan Simmons A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company The Human Front by Ken MacLeod In this compassionate coming of age tale the details of life are just a bit off from things as we know them and nothing is as it appears to be Glacial by Alastair Reynolds A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction The twenty six stories in this collection imaginatively takes us far across the universe into the very core of our beings to the realm of the gods and the moment just after now Included here are the works of masters of the form and of bright new talents including Eleanor ArnasonChris BeckettMichael BlumleinMichael CassuttBrenda W CloughPaul Di FilippoAndy DuncanCarolyn Ives GilmanJim GrimsleySimon IngsJames Patrick KellyLeigh KennedyNancy KressIan R MacLeodKen MacLeodPaul J McAuleyMaureen F McHughRobert ReedAlastair ReynoldsGeoff RymanWilliam SandersDan SimmonsAllen M SteeleCharles StrossMichael SwanwickHoward WaldropSupplementing the stories are the editor s insightful summation of the year s events and a lengthy list of honorable mentions making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart Exploring Colorado Highways Michael Heim,2007 *Science Fact*

*and Science Fiction* Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings *Science Fact and Science Fiction* examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed *Speculative Epistemologies* John Rieder, 2021-09-15 *Speculative Epistemologies* is about truth effects in sf which stands for both science fiction and speculative fiction It examines six narratives one from each decade from the 1960s to the 2010s that challenge dominant assumptions about the normal the possible and the real It asks what the patterns of overlap and interference generated by texts located in border territories that make their identification as sf problematic and sometimes controversial can reveal about the dynamics of sf s multiple subcultures e g professionals academics and fans the complexity of the genre s communities of practice and their routes of production distribution and reception and the genre s shifting position within a broadly conceived field of literary and cultural production The speculative epistemologies in these stories are counter hegemonic ways of knowing ways of imagining knowing differently and the focus of this study is their effect on the formation of identities and communities Combining the methods of genre theory reception theory and the sociology of cultural production the readings of these six narratives trace a history of sf s increasingly feminist racially and ethnically diverse philosophically ambitious and politically engaged character from the 1960s to the present

physicists to create the ultimate Unified Theory of Everything but like all great theories even theirs had limitations Centuries after the first Dorts arrived Laura Shane was born She reinterpreted the Dort Theory by giving it the finishing touch of her genius It led to the faster than light removal of miles deep cone shaped plugs from planet Earth The latest and largest such Cone carried a crew of thousands It was named the Great Cone of Transformation Through his 3T Corporation Ned Keller directed the creation of Cones Despite Lauras unease about her first voyage into space she and Ned went together on the Great Cones maiden mission Two weeks later they were light years from home when Neds boss Jack Lewis arrived to inform them of an event on Earth with implications for their mission Unfortunately his concern did not include awareness of what those implications might be but they were already in peril It was sabotagethe first in a series of calamities Before the final calamity began to close in on them the Big Rip set to destroy the entire local multiverse and before Jacks recent arrival it was still teatime on the Great Cone Laura and Ned were having a pleasant morning beside her pool The story begins there with our attractive young genius sipping tea and deep in thought about her bewildering circumstances and the unchanged perception of all the things around her Ned was reading comfortably in a nearby lounge chair Now and then hed look up to speak of love while shamelessly admiring her long and lovely legs *The Hugo, Nebula and World Fantasy Awards* Howard DeVore,1998 Science fiction fans have voted for the Hugo Awards for best science fiction almost every year since 1953 Science fiction professionals have presented the Nebula Awards to their peers since 1965 In all this time lists of winners have been widely available but the losers have usually been ignored In 1970 long time fan Howard DeVore started publishing a complete listing of Hugo and Nebula awards including the stories that were nominated but did not win The fact that stories were nominated implied that they had considerable merit Mr DeVore felt that a complete listing would let fans compare them The International Fantasy Awards may have inspired the Hugos so he added them DeVore brought out new editions year by year publishing and distributing them himself with the aid of a number of devoted science fiction fans By 1998 the task had grown to the point where Mr DeVore happily relinquished the job to Advent This edition includes introductory and historical essays explaining how each award got started and how nominees and winners are chosen plus commentary in the yearly listings An Informal History of the Hugos Jo Walton,2018-08-07 Engaged passionate and consistently entertaining An Informal History of the Hugos is a book about the renowned science fiction award for the many who enjoyed Jo Walton s previous collection of writing from Tor com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor com surveying the Hugo finalists and winners from the award s inception up to the year 2000 Her contention was that each year s full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton s cheerfully opinionated and vastly well informed posts provoked valuable

conversation among the field's historians. Now these posts, lightly revised, have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton, Gardner Dozois, and David G. Hartwell. A remarkable guided tour through the field, a kind of nonfiction companion to *Among Others*. It's very good. It's great. New York Times bestselling author Cory Doctorow. *Boing Boing* on *What Makes This Book So Great*.      **Chemistry and Science Fiction** Jack H. Stoker, 1998. This lively collection looks at science as filtered through literature, film, and television. It discusses classic works in science fiction and provides an in-depth look at the chemistry depicted in popular culture, particularly in *Star Trek*, *Star Wars*, and *Doctor Who*. It includes an examination by Nebula Award winner Connie Willis of how science fiction authors use science and reprints two tongue-in-cheek short stories by Isaac Asimov. The book also includes suggestions for using science fiction as an educational resource.      *Mystery and Detection* Jerry D.
