drinking patterns can lead to serious physical mental and social harms Drinking in Context is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes drinking patterns targeted interventions and partnership development An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking As a result there has been a shift towards interventions that address the targeted reduction of harm These approaches recognize socio cultural differences and avoid trying to impose a one size fits all solution In this context multi stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society Shared responsibilities lead to shared solutions
