The Reemergence Of Civil Society In Eastern Europe And The Soviet Union Zbigniew Rau, 2019-06-26 The turmoil that shook Eastern Europe in the late 1980s and challenged traditional centers of power in the Soviet Union has touched off an intense debate about the forces behind the recent collapse of Soviet type systems Civil society a key concept in the debate is the focus of this thought provoking volume which contrasts the views of Eastern scholars and activists in independent movements against those of Western academics The authors various perspectives on the struggle between the people and their governments highlight different facets of civil society providing new insights into its definition origin and function within a nation s public life

The Weakness of Civil Society in Post-Communist Europe Marc Morjé Howard, 2003-03-27 Over a decade has passed since the collapse of communism yet post communist citizens are still far less likely to join voluntary organizations than people from other countries Why do post communist citizens mistrust public organizations What explains this pattern of weak civil society And what does this mean for democracy in the region This engaging study addresses these questions with a provocative argument about the enduring impact of the communist experience on its countries and citizens Howard argues that the experience of mandatory participation in state controlled organizations and vibrant private networks during the communist period combined with the disappointment with post communist developments have left most citizens with a lasting aversion to public activities Howard analyzes the findings from over 30 democratic countries on the World Values Survey and also presents extensive and original evidence from his own research focused on Eastern Germany and Russia

[Democracy Building and Civil Society in Post-Soviet Armenia](#) Armine Ishkanian, 2008-03-26 This volume considers the challenges of democracy

building in post Soviet Armenia and the role of civil society in that process It argues that contrary to the expectations of Western aid donors who promoted civil society on the assumption that democratization would follow from the establishment of civil society democratic regimes have failed to materialize and moreover a backlash has emerged in various post Soviet states Armine Ishkanian explores how far the growth of civil society depends on a country s historical political and socio cultural context and how far foreign aid often provided with conditions which encouraged the promotion of civil society had an impact on democratization Based on extensive original research including fieldwork interviews with participants Democracy Building and Civil Society in Post Soviet Armenia considers various democratization initiatives in recent years and assesses how far the Armenian experience is similar to or different from the experiences of other post Soviet states

What was Socialism, and what Comes Next? Katherine Verdery,1996-03-07 By analyzing her primary data from Romania and Transylvania and synthesizing information from other sources Verdery lends a distinctive anthropological perspective to a variety of themes common to political and economic studies on the end of socialism themes such as civil society the creation of market economies privatization national and ethnic conflict and changing gender relations

Poland's Return to Capitalism Gavin Rae,2007-11-28 PLEASE NOTE THIS IS AN NJR AND BLURB SHOULD NOT BE USED IN ITS RAW FORM This book considers the social economic and political consequences of Poland s transition from socialism to capitalism The immense changes that have occurred in the country over the past decade and a half are analysed in their historical and geo political framework Poland was the first Eastern European country to return to capitalism with its shock therapy economic reforms replicated throughout the region These sought to dismantle the socialist elements of the economy as rapidly as possible and open up the post socialist countries to the world capitalist market The former socialist

countries were absorbed into the international division of labour and their economies quickly became a part of and dependent upon the global capitalist system. The revolutions of 1989-91 not only transformed Eastern Europe but instigated fundamental changes to the international capitalist system itself. By opening up the ex-socialist economies to international capital, a new era of globalisation was opened as the principles and practices of neo-liberalism gained ascendancy. While a section of society prospered from this opening, other social groups saw their living standards decline, creating large social inequalities. One consequence of these social divisions has been the destabilising of the newly created democratic political systems. The growth of more authoritarian conservative political currents in Poland is an example of this. As the largest and most strategically important country in Central Eastern Europe, Poland has increasingly become a focus of international relations between the major powers. Events in Poland, especially after European expansion, influence relations between the USA, the European Union and Russia. This book therefore looks both at how the absorption of Poland into the international capitalist system has transformed the country and at how this process is contributing to developments globally. It finishes by considering developments since EU Accession and at the expected results of this expansion both within Poland and an enlarged EU.

Japan's Dual Civil Society Robert Pekkanen, 2006. Japan differs from other industrialized democracies in having many small local groups but few large professionally managed national organizations. This book provides a comprehensive overview of Japan's civil society and a new theory based on political institutions to explain why it has developed as it has.

Civil Society Before Democracy Nancy Bermeo, Philip Nord, 2000-11-15. Bringing together historians and political scientists, this unique collaboration compares nineteenth-century civil societies that failed to develop lasting democracies with civil societies that succeeded. Much of the current literature on the connection between civil society and consolidating democracy focuses exclusively on single contemporary polities that are ever-changing and uncertain. By studying historical cases, the authors are able to demonstrate which civil societies developed in tandem with lasting democracies and which did not. Contrasting these two sets of cases, the book both enlightens readers about individual countries and extracts lessons about the connections between civil society and democracy in contemporary times. Above all, the authors ask the vital but under-researched question: How and why does democratic civil society develop?

Out of and Into Authoritarian Law András Sajó, 2002-12-01. The essays in this collection reflect on the promises, hopes and fears dominant in the narratives on and realities of doing away with authoritarian regimes. The experiences of post-communist transition are matched with accounts on authoritarian traits present in established constitutional democracies and on authoritarian inclusions preserved in the new regimes in the post-transition phase. The essays combine first-hand insider accounts with interdisciplinary scholarly analysis. The first part of the collection focuses on considerations marking the way out of authoritarianism, not restricted to socialist regimes. The second part centers around experiences and problems which surface following the days of totalitarianism both in newly emerged democracies and in well-established constitutional

systems Issues covered range from police practices to the role of the people in post authoritarian regimes The dilemma transparent in all essays is whether coming out of authoritarianism is possible at all

Associations and the Chinese State: Contested Spaces Jonathan Unger, 2014-12-18 What role do Chinese popular associations play in the expansion of civil society and democratization Under Mao few associations were permitted to exist while today over 200 000 associations are officially recognized Are they important foundations of civil society or vehicles for state corporatism and control In this book leading China specialists examine an interesting range of associations from business associations to trade unions to urban homeowners associations women s groups against domestic violence and rural NGOs that develop anti poverty programs The contributors find different important trends underway in different parts of China s economy and society Their findings are nuanced insightful and often not what might be expected
