An Introduction to the Maithili

Dialect of the Bihari Language as Spoken in North Bihar George Abraham Grierson, 1909 **A Theory of Phonological Features** San Duanmu, 2016-03-17 This book outlines a system of phonological features that is minimally sufficient to distinguish all consonants and vowels in the languages of the world The extensive evidence is drawn from datasets with a combined total of about 1000 sound inventories The interpretation of phonetic transcriptions from different languages is a long standing problem In this book San Duanmu proposes a solution that relies on the notion of contrast X and Y are different sounds if and only if they contrast in some language He focuses on a simple procedure to interpret empirical data for each phonetic dimension all inventories are searched in order to determine the maximal number of contrasts required In addition every unusual feature or extra degree of contrast is re examined to confirm its validity The resulting feature system is surprisingly simple fewer features are needed than previously proposed and for each feature a two way contrast is sufficient Nevertheless the proposal is reliable in that the notion of contrast is uncontroversial the procedure is explicit and the result is repeatable The book also offers discussion of non contrastive differences between languages sound classes and complex sounds such as affricates consonant glide units consonant liquid units contour tones pre nasalized stops clicks ejectives and implosives **The Aborigines of Sakhalin** Alfred F. Majewicz, Richard A. Rhodes, Werner Winter, 1998-09-16 Volume 1 The Aborigines of Sakhalin contains translations into English of the Polish Russian and Japanese material on for example the history folklore economic life shamanism sexual life medical anthropology and the bear festival which has been published between 1898 and 1936 mainly in local journals which are hardly accessible today English French and German articles appear in the original language **Linguistic Foundations of Identity** Om Prakash, Rajesh Kumar, 2020-11-02 The collection of chapters in this book brings together researchers working in paradoxes and complexities of cultural identities through uses of language and literature from varied perspectives This volume is an important step towards achieving the goal of reaching out to many who have been looking at the complexities of identity formation from linguistic cultural social and political perspectives Please note This title is co published with Aakar Books New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh Maldives and Sri Lanka

Catching Language Felix K. Ameka, Alan Dench, Nicholas Evans, 2008-08-22 Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world's 6 000 languages They bring together in one place a coherent treatment of how the whole language works and therefore form the primary source of information on a given language consulted by a wide range of users areal specialists typologists theoreticians of any part of language syntax morphology phonology historical linguistics etc and members of the speech communities concerned The writing of a

descriptive grammar is a major intellectual challenge that calls on the grammarian to balance a respect for the language's distinctive genius with an awareness of how other languages work to combine rigour with readability to depict structural regularities while respecting a corpus of real material and to represent something of the native speaker's competence while recognising the variation inherent in any speech community. Despite a recent surge of awareness of the need to document little known languages there is no book that focusses on the manifold issues that face the author of a descriptive grammar. This volume brings together contributors who approach the problem from a range of angles. Most have written descriptive grammars themselves but others represent different types of reader. Among the topics they address are overall issues of grammar design, the complementary roles of outsider and native speaker grammarians, the balance between grammar and lexicon, cross linguistic comparability, the role of explanation in grammatical description, the interplay of theory and a range of fieldwork methods in language description, the challenges of describing languages in their cultural and historical context and the tensions between linguistic particularity, established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework. This book will renew the field of grammaticography, addressing a multiple readership of descriptive linguists, typologists and formal linguists by bringing together a range of distinguished practitioners from around the world to address these questions.

The Case System of Eastern Indo-Aryan Languages

Bornini Lahiri, 2021-04-29. This book presents a typological overview of the case system of Eastern Indo-Aryan (EIA) languages. It utilizes a cognitive framework to analyse and compare the case markers of seven EIA languages: Angika, Asamiya, Bhojpur, Bangla, Magahi, Maithili and Odia. The book introduces semantic maps which have hitherto not been used for Indian languages to plot the scope of different case markers and facilitate cross linguistic comparison of these languages. It also offers a detailed questionnaire specially designed for fieldwork and data collection which will be extremely useful to researchers involved in the study of case. A unique look into the linguistic traditions of South Asia, the book will be indispensable to academicians, researchers and students of language studies, linguistics, literature, cognitive science, psychology, language technologies and South Asian studies. It will also be useful for linguists, typologists, grammarians and those interested in the study of Indian languages.

Finiteness Irina Nikolaeva, 2007-04-06. This book explores the nature of

finiteness, one of the most commonly used notions in descriptive and theoretical linguistics but possibly one of the least understood. Scholars representing a variety of theoretical positions seek to clarify what it is and to establish its usefulness and limitations. In doing so they reveal cross linguistically valid correlations between subject licensing, subject agreement, tense, syntactic opacity and independent clausehood, show how these properties are associated with finiteness and discuss what this means for the content of the category. The issues explored include how different grammatical theories represent finiteness, whether the finite/nonfinite distinction is universal, whether there are degrees of finiteness, whether the syntactic notion of finiteness has a semantic corollary, whether and how finiteness is subject to change and how finiteness features in

language acquisition Irina Nikolaeva opens the book by describing the history of finiteness and its place in current thinking and research She then introduces the chapters of the book comparing the authors perspectives and showing what they have in common The book is then divided into four parts Part I considers the role finiteness plays in formal syntactic theories and Part II its deployment in functional theories and as the subject of research in typology Parts III and IV look respectively at the finite nonfinite opposition in individual languages and at the role finiteness plays in linguistic change and linguistic development The book is written and structured to appeal to scholars and students of syntax and general linguistics at graduate level and above

Towards a Holistic Understanding of Language Contact in the Past Nikolaos

Lavidas, Ioanna Sitaridou, Igor Yanovich, 2025-10-06 The tendency to view grammar in isolation from multilingual settings is so pervasive that even modern approaches do not often overcome the monolingual paradigm At the same time the effects of language contact very clearly manifest themselves as discussed in the literature on language contact contact induced and shared grammaticalization sometimes resulting in areal patterns particularly relevant for linguistic typology It appears that there continues to be an important gap between the fact of commonly happening grammatical transfer in language contact and our theorizing about such grammars This gap needs to be narrowed and eventually closed for the sake of both theories of grammar and theories of language contact In fact one can take this further and ask the question Do we really need a separate theory of language contact The rather attractive alternative would be to reduce the effects of language contact to theories of language acquisition sociolinguistics external factors as well as more generalised cognitive mechanisms such as copy and analogy which once properly interwoven they can offer holistic explanations The aim of the edited volume is to contribute to this and other related questions
