What do we know And how do we know it The questions are not unique to our era she notes but our responses to them are our own Looking at issues of globalization science politics gender social inequality and other social formations that shape our world this insightful book advocates a new agenda not only for communication research but also for the writing\_and language\_that comes out of it *Gender, Science and Mathematics* L. H. Parker, L. Rennie, B. Fraser, 2012-12-06 Throughout the Western world the relationship between gender science and mathematics has emerged as critical in a variety of contexts In tertiary institutions the study of gender issues frequently with reference to science and mathematics is of central significance to many disciplines Gender studies are being offered as separate courses or parts of existing courses in preservice and postgraduate teacher education women's studies technology studies and policy studies In addition in the broader context of education at all levels from primary elementary through to higher concerned policy makers and practitioners frequently focus on the interaction of gender science and mathematics in their attempts to reform and improve education for all students In all of these contexts there is an urgent need for suitable texts both to provide resources for teachers and students and to inform policy makers and practitioners This book has been developed specifically to meet this need It is designed to be used throughout the world in a variety of tertiary courses and by policy makers concerned with activities which interface with the gender science mathematics relationship It provides examples which illustrate vividly the rich field from which practitioners and policy makers in this area now can draw Its particular appeal will stem from its practical approach and creative future perspective the international renown of the authors and the generalisability of the recent research and thinking presented in each of the chapters *Beyond Epistemology* Sharyn Clough, 2003 Feminist thinkers have been critically examining science for over a century but who critiques the criticism *Science on the Home Front* Jordynn Jack, 2009 A critical essay of the rhetorical and cultural obstacles faced by women scientists *Seeing Nature Through Gender* Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly

often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shed bunnies Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet
