*Educating for Creativity within Higher Education* Phillip McIntyre, Janet Fulton, Elizabeth Paton, Susan Kerrigan, Michael Meany, 2018-07-04 This book provides innovative insights into how creativity can be taught within higher education Preparing students for employment in a dynamic set of global creative industries requires those students to not only be resilient and entrepreneurial but also to be locally focused while being globally aware Therefore it is imperative that they acquire a thorough understanding of creative processes and practice as they try to keep pace with worldwide digital trends As the creation of media messages is a fundamental aspect of global creative industries and that numerous concerns practitioners face are based upon a certain understanding of creativity the authors propose an exploration of what creativity is in terms of research and then apply it pedagogically Drawing on extensive empirical research the authors pose the thought provoking question of whether creativity can be taught This volume will be of interest to both students and scholars of creativity and higher education as well as to creatively based practitioners more widely

**Governing Higher Education: National Perspectives on Institutional Governance** Alberto Amaral, Glen Jones, B. Karseth, 2013-11-11 Over the last decades higher education has gone through an unprecedented growth period and as a result the average university or college has now more students and a larger output than ever before At the same time the socio economic and political demands with respect to higher education have grown dramatically These developments have taken place without a proportional increase of the budgets and facilities of the higher education institutions This has created an imbalance between the expectations with respect to higher education and the institutional capacities in the sector One of the underlying trends is that the traditional pact between higher education and society has become problematic Society no longer accepts the

rather special and protected position that universities have had for a very long time in our societies The knowledge based social and cultural missions of higher education institutions are no longer taken for granted as the main legitimacy bases for public investments in higher education Universities and colleges are at present expected to function efficiently to contribute to sustainable economic growth at various levels and to add to national and even supranational trade balances On top of this they have to prove that they maintain a high level of quality in their primary activities i e teaching research and services while adapting and responding to the expectations expressed so vehemently in their environments and to a decreasing per capita funding basis *Inside the Role of Dean* Renee T Clift, John Loughran, Geoffrey E Mills, Cheryl J Craig, 2015-03-02

Despite deans playing critical roles in education little is known about the knowledge skills and dispositions needed for the job or the practical dilemmas they face on an almost daily basis Each chapter of this international collection opens the role up for examination and critique developing a deeper understanding of what it means to be a dean and offering insights into the transition into the role managing the daily demands and expectations of it and what it means to exit the deanship The book brings being a dean and the leadership inherent in the position into sharp focus based on international perspectives on doing the job Higher Education Transformation in Africa Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami

Atibuni, 2024-11-05 This book critically interrogates the notion of transformation in higher education focusing on epistemological and structural issues in postcolonial and contemporary Africa The book considers the multifaceted challenges facing higher education in the continent and uses the concept of transformation as a common thread weaving through a range of issues including epistemology identity relevance research collaboration and decoloniality Arguing for a holistic approach towards progressive and innovative education systems the book calls for a fundamental transformation that expands access enhances quality and competitiveness addresses past injustices and improves the capacity to act together for a more sustainable and just future Overall the book makes a powerful case for the power of transformation in higher education to shape the social economic and cultural fabric of society This book s critical evaluation of knowledge production in Africa will be an important read for researchers and policymakers involved in Africa s higher education sector

**Demystifying Critical Reflection** Namala Tilakaratna, Eszter Szenes, 2024-01-24 Drawing on Legitimation Code Theory LCT this volume reveals the knowledge practices and language of critical reflection in a range of different subjects making clear how it can be taught and learned Critical thinking is widely held to be a key attribute required for successfully living learning and earning in modern societies Universities now list critical thinking as a key graduate quality and use critical reflection as a way of teaching students how to become reflective and ethical professionals Yet what critical reflection actually involves remains vague in research teaching practice and assessment Studies draw on LCT a fast growing framework for revealing the knowledge practices that enable educational success and the individual chapters focus on a diverse range of contexts across the disciplinary map including education science arts sociology and nursing The book

further connects research and practice by presenting in depth analyses of critical reflection and providing practical insights into how LCT can be used to design pedagogic interventions The book offers a rich resource for both scholars and teachers who want to demystify critical reflection and prepare university students for the modern workplace
