National Commission on Excellence in Education, 1983 Extending Educational Reform Amanda Datnow, Lea Hubbard, Hugh Mehan, 2002-03-14 In an effort to improve student achievement thousands of US schools have adopted school reform models devised externally by universities and other organizations Such models have been successful in improving individual schools or groups of schools but what happens when educational reform attempts to extend from one school to many Through qualitative data from several studies this book explores what happens when school reform goes to scale Topics covered include why and how schools are adopting reforms the influence of the local context and wider constraints on the implementation of reform teachers and principals as change agents in schools the evolution of reform design teams the implementation sustainability and expiration of reform and its impact on educational change Each chapter concludes with guidelines for policy and practice This book will be of interest to educational leaders and staff developers educational researchers and policy makers in the US and internationally **The Fiscal, Legal, and Political Aspects of State Reform of Elementary and Secondary Education** Van D. The Reauthorization of the Elementary and Secondary Education Act** Department of Education (ED), Office of Planning, Evaluation and Policy Development, 2010 On Saturday March 13 the Obama administration released its blueprint for revising the Elementary and Secondary Education Act ESEA which would ask states to adopt college and career ready standards and reward schools for producing dramatic gains in student achievement The proposal challenges the nation to embrace educational standards that would put America on a path to global leadership The blueprint provides incentives for states to adopt academic standards

that prepare students to succeed in college and the workplace and create accountability systems that measure student growth toward meeting the goal that all children graduate and succeed in college This blueprint builds on the significant reforms already made in response to the American Recovery and Reinvestment Act of 2009 around four areas 1 Improving teacher and principal effectiveness to ensure that every classroom has a great teacher and every school has a great leader 2 Providing information to families to help them evaluate and improve their children s schools and to educators to help them improve their students learning 3 Implementing college and career ready standards and developing improved assessments aligned with those standards and 4 Improving student learning and achievement in America s lowest performing schools by providing intensive support and effective interventions Incorporating and extending this framework this blueprint for a re envisioned federal role builds on these key priorities 1 College and Career Ready Students 2 Great Teachers and Leaders in Every School 3 Equity and Opportunity for All Students 4 Raise the Bar and Reward Excellence and 5 Promote Innovation and Continuous Improvement **Research in Education** ,1974 Studies of Education Reform Margaret E.
