The Economics of Natural Resources in Latin America Osmel E. Manzano M., Fernando Navajas, Andrew Powell, 2017-11-15 Revenues from commodities are extremely important for Latin America and the Caribbean yet there is very little literature on the structure of these industries and on the various ways in which the state obtains commodity revenues This book aims to understand the trade off between the degree of taxation overall the profitability of the relevant industry and the amount of investment and subsequent production in the region as well as the relevance of institutions in the performance of the sector This volume focuses on economic efficiency where Latin America stands in terms of the current tax system for the extractive sector how policies have changed in this regard and how policies may be improved The Economics of Natural Resources in Latin America is timely since this new era of lower and volatile prices and possible reconfiguration of investment flows poses a challenge to natural resource tax systems in the world The argument of the book will be made by a collection of papers around the issue of tax efficiency in the region and concludes with chapters on institutions and the role of transparency This book shows that there are varieties of experiences in resource taxation and management of revenues in Latin America that could be used to shape policy interventions in other regions This variety is not only related to their diverse impact on welfare but also on the policy challenges faced by the countries in the region This volume is well suited for those who study and find

interest in development economics political economy and public finance as well as policy Politicians and Economic Reform in New Democracies Kent Eaton,2010-11 As economic reform in developing countries has shifted from macroeconomic stabilization to liberalization opportunities for legislators to influence the process and outcome of reform have increased and their role has become more important This book focuses attention on differences in institutional structure in political parties and electoral rules to show how they create incentives that can explain the varying ways in which legislators respond to policy initiatives from the executive branch In Argentina and the Philippines presidents proposed similar fiscal reforms in the 1990s expanding tax bases strengthening tax administration and redesigning tax revenue sharing with subnational governments Drawing on archival research and interviews with policy makers Kent Eaton follows the path of legislation in these three areas from initial proposal to final law to reveal how it was shaped by the legislators participating in the process Obstacles to the adoption of reform he demonstrates are greater in candidate centered systems like the Philippines where the cultivation of personal reputations is paramount than in party centered systems like Argentina s where loyalty to party leaders is emphasized To test his argument further Eaton looks finally at other kinds of reform ventured in these two countries and at tax reforms attempted in some other countries **Rules-Based Fiscal Policy in Emerging Markets** G. Kopits,2004-09-21 Inspired by the experience of some advanced economies a number of emerging market economies have recently adopted rules limiting the budget deficit expenditure level or indebtedness of the public sector while others consider them for eventual adoption This volume brings together policy analysts to discuss the rationale suitability and usefulness of fiscal policy rules in emerging market economies Grouped under three main parts political economy and macroeconomic setting design issues at the national level design issues at the subnational level the chapters have a practical orientation based on conceptual grounding Fiscal Space Rathin Roy,Antoine Heuty,2012-05-31 With the deadline for achieving the 2015 Millennium Development Goals MDGs less than a decade away the uneven progress is raising important questions about the ability of the international community to scale up its efforts to finance the goals Securing adequate financing for development has thus become the most pressing issue of the development agenda This groundbreaking volume by leading development economists and practitioners addresses the central concern for policymakers involved in long term planning for the MDGs how to create fiscal space for the MDGs and strengthen domestic resource mobilization for human development while ensuring long term sustainability and freedom from reliance on aid By looking at the evidence with fresh perspectives the authors present a novel approach by which fiscal policy can be made to work for the poor for the long term Published with UNDP and Revenue Watch Financial Sector Reform N. The 2012 Dominican Tax Reform in Historical and Regional Context James E. Mahon Jr., 2015-04-07 In November 2012 publicly worried about a large fiscal deficit the new government of President Danilo Medina passed a tax reform The move was preceded by technical discussions with the International Monetary Fund IMF consultations with various social and economic interests and the convocation for just over two weeks of the new Economic and Social Council Many factors pointed to the success of a major reform The President's party the Dominican Liberation Party Partido de la Liberación Dominicana PLD enjoyed an overwhelming majority in the Senate and along with its allies a clear majority in the House of Representatives The 2030 National Development Strategy publicly discussed at length during the period 2010-11 and signed into law on the first day of 2012 by the previous government also of the PLD had set fiscal revenue levels above those recorded in 2011-12 However despite the obvious need the international support the fresh mandate of the President and the undisputed control of almost all the formal seats of power in the country the reform was rightly called half of a reform or even a missed opportunity Why Is another large reform possible in the coming years This paper attempts to answer these questions through an analysis of the political economy of the tax reforms with reference to Dominican history as well as to the regional context Finally the paper focuses on the relationship between the executive and the interests of the private sector and its possible mediation through the political parties and as was done too hastily in October 2012 civil society forums such as the CES The first part outlines the major tax reforms that took place in the Dominican Republic between its democratic opening in 1978 and the 2012 efforts along with the political and economic conditions in each case with a special focus on the 1992 reform Next the document describes the rigidities that accumulated during that period which were the legacy of crisis international commitments and the goals of the ambitious tax revenue goals of the National Development Strategy The second and longest section describes the regional debate on tax policy and redistribution while showing how the Dominican Republic is situated in this scenario with statistics on the fiscal performance of the Dominican Republic and other Caribbean and Central American countries From there with the ground prepared the paper narrates the process of the 2012 reform and investigates the question posed above by comparing different episodes of fiscal reform Finally the paper discusses the challenges and possibilities for future reforms from narrow technical ones to those that would involve a broad and reciprocal process with a focus on the role that could be played by fiscal pacts
