Opening Education Terry Evans,Daryl Nation,2013-04-15 We live in a society with ever changing needs and expectations Education practitioners and policy makers need therefore to face the challenges of new economic social and technological conditions in their work There is a global concern to develop forms of education and training which are open to the demands of needs of learners and which are accessible at times and places suitable to those learners Governments institutions and practitioners are developing and implementing policies which reflect these trends The overall theme of this book is the relationship between government and organizational policies and the work of practitioners in open and distance learning The book does this by exploring a selection of international examples The authors many of them recognized experts

write from a wide range of international and organizational perspectives Each one draws on significant experience within his or her field Terry Evans is Head of the Graduate School of Education at Deakin University He was the foundation director of the Master of Distance Education course there and has extensive experience teaching undergraduate and postgraduate students Daryl Nation is Deputy Head of the School of Humanities and Social Sciences at Monash University He is Associate Professor in the School and divides his time between policy development research and teaching No Alternative? Cole, 2000-06-30 There has been an explosion of Web based courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions *The Death of Luigi Trastulli and Other Stories* Alessandro Portelli, 2010-03-30 Portelli offers a new and challenging approach to oral history with an interdisciplinary and multicultural perspective Examining cultural conflict and communication between social groups and classes in industrial societies he identifies the way individuals strive to create memories in order to make sense of their lives and evaluates the impact of the fieldwork experience on the consciousness of the researcher By recovering the value of the story telling experience Portelli's work makes delightful reading for the specialist and non specialist alike
