Losing Our Cool Stan Cox, 2010-05-25 Losing our Cool shows how indoor climate control is colliding with an out of

control outdoor climate In America energy consumed by home air conditioning and the resulting greenhouse emissions have doubled in just over a decade and energy to cool retail stores has risen by two thirds Now the entire affluent world is adopting the technology As the biggest economic crisis in eighty years rolls across the globe financial concerns threaten to shove ecological crises into the background Reporting from some of the world s hot zones from Phoenix Arizona and Naples Florida to southern India Cox documents the surprising ways in which air conditioning changes human experience giving a boost to the global warming that it is designed to help us endure providing a potent commercial stimulant making possible an impossible commuter economy and altering migration patterns air conditioning has helped alter the political hue of the United States by enabling a population boom in the red state Sun Belt While the book proves that the planet s atmosphere cannot sustain even our current use of air conditioning it also makes a much more positive argument that loosening our attachment to refrigerated air could bring benefits to humans and the planet that go well beyond averting a climate crisis Though it saves lives in heat waves air conditioning may also be altering our bodies sensitivity to heat our rates of infection allergy asthma and obesity and even our sex drive Air conditioning has eroded social bonds and thwarted childhood adventure it has transformed the ways we eat sleep travel work buy relax vote and make both love and war The final chapter surveys the many alternatives to conventional central air conditioning By reintroducing some traditional cooling methods putting newly emerging technologies into practice and getting beyond industrial definitions of comfort we can make ourselves comfortable and keep the planet comfortable too

Technology and Innovation in Adult Learning Kathleen P.

King, 2017-02-10 A comprehensive exploration of technology's role in adult learning Technology and Innovation in Adult Learning introduces educators and students to the intersection of adult learning and the growing technological revolution Written by an internationally recognized expert in the field this book explores the theory research and practice driving innovation in both adult learning and learning technology and illuminates a powerful approach to recognize and leverage these opportunities Building on current trends and research in technology and its use each chapter illustrates the need opportunities and examples of current and future technologies that scaffold adult learning and provides comprehensive coverage of both current and emerging challenges Many adult learning faculty practitioners and students realize that technology presents a growing and ever present set of issues yet few feel confident in identifying the opportunities that arise with each step forward This book clarifies the interplay between adult learning and learning technology and characterizes the cyclic exchange of information and opportunities that link these fields now and in the future Understand the critical issues currently affecting adult learning Learn how technology is presenting both opportunities and challenges for the teaching and learning of adults in different contexts Examine recent research on learning technology for adult learners Discover how technological innovation can be applied now and how it will continue to shape the future of learning Adult learning is on the rise and there is no mistaking technology's role whether they're learning with or about technology today's adult learners come with unique sets of needs and skills that demand specialized approaches Traditional pedagogical techniques don't transfer directly and learning technology requires its own unique approach to development and use Technology and Innovation in Adult Learning equips practitioners to further adult learning and shape the future of the field while providing a rich perspective for classroom inquiry and research

Sound Design and Science Fiction William Whittington, 2021 Sound is half the picture and since the 1960s film sound not only has rivaled the innovative imagery of contemporary Hollywood cinema but in some ways has surpassed it in status and privilege because of the emergence of sound design This in depth study by William Whittington considers the evolution of sound design not only through cultural and technological developments during the last four decades but also through the attitudes and expectations of filmgoers Fans of recent blockbuster films in particular science fiction films have come to expect a more advanced and refined degree of film sound use which has changed the way they experience and understand spectacle and storytelling in contemporary cinema The book covers recent science fiction cinema in rich and compelling detail providing a new sounding of familiar films while offering insights into the constructed nature of cinematic sound design This is accomplished by examining the formal elements and historical context of sound production in movies to better appreciate how a film sound track is conceived and presented Whittington focuses on seminal science fiction films that have made specific advances in film sound including 2001 A Space Odyssey THX 1138 Star Wars Alien Blade Runner original version and director's cut Terminator 2 Judgment Day and The Matrix trilogy and games milestones of the entertainment industry's technological and aesthetic

advancements with sound Setting itself apart from other works the book illustrates through accessible detail and compelling examples how swiftly such advancements in film sound aesthetics and technology have influenced recent science fiction cinema and examines how these changes correlate to the history theory and practice of contemporary Hollywood filmmaking

Energy Efficiency Great Britain: Parliament: House of Lords: Science and Technology Committee,2005-07-15 The Committee's report examines the contribution that energy efficiency can make towards achieving the Government's objective to reduce carbon dioxide emissions by 20 per cent by 2010 as set out in the Energy White Paper Our energy future creating a low carbon economy Cm 5761 ISBN 0101576129 published in February 2003 The report examines in detail the practical measures designed to achieve this objective as outlined in the Government's Energy Efficiency Action Plan Cm 6168 ISBN 0101616821 published in April 2004 It focuses on the contribution of business and industry which represents almost a third of total emissions and of households which represents almost one quarter it does not examine the contribution of the transport sector or consider renewable energy issues in detail as these have been covered in other Select Committee reports Amongst its findings the Committee argues that the main objective of energy efficiency should be the reduction of the UK's absolute energy consumption leading to lower emissions and proposes a methodology to measure progress towards this objective Other issues highlighted include the enormous wastefulness of the electricity generating industry the need for greater Government clarity and leadership in promoting energy efficiency and better public education about energy use and its economic and environmental costs
