Refugees In The Age Of Total War:

Refugees in the Age of Total War Anna C. Bramwell, 2021-11-21 This book first published in 1988 charts society's responses to the huge numbers of refugees in Europe and the Middle East during and after the Second World War. At the close of the war, large areas of Europe lay in ruins and large numbers of refugees faced upheaval and famine. Political considerations influenced the decisions as to who received assistance and refugees were forcibly repatriated or resettled and in the analysis of these matters and more both the refugee crises of the 1940s and their relevance today are highlighted.

Refugees in an Age of Genocide Katharine Knox, Tony Kushner, 2012-10-12 This is a study of the history of global refugee movements over the 20th century ranging from east European Jews fleeing Tsarist oppression at the turn of the century to asylum seekers from the former Zaire and Yugoslavia. Recognizing that the problem of refugees is a universal one, the authors emphasize the human element which should be at the forefront of both the study of refugees and responses to them.

Mass Expulsion in Modern International Law and Practice Jean-Marie Henckaerts, 2021-09-27 **The Age of Interconnection** Jonathan Sperber, 2023 A monumental and accessible global history of the second half of the twentieth century from the end of World War Two to the terrorist attack on the Twin Towers offering readers the most complete portrait of the age available.

The Grand Alliance and Ukrainian Refugees M. Dyczok, 2000-07-11 This study explores the role of refugees in international relations by looking at the largest involuntary migration of Ukrainians in history. Using both Western and newly available Soviet sources, it sheds light on Grand Alliance policies towards World War II Ukrainian refugees. It demonstrates how the activities of this particular group of refugees had an impact on international refugee policy and provides insight into the origins of the Cold War.

The Future of the United Nations System Chadwick F. Alger, 1998 What does the future hold for the UN? In this book, twenty-two scholars from all continents contribute twelve chapters that cover prevention of violence, creating economic and social structures that sustain human fulfilment, sharing and protecting the commons, and peace education. The search for future potential based on experience in these twelve laboratories leads to sixty-six recommendations for new institutions and programs on issues that include controlling weapons, humanitarian intervention, collaboration between UN peacekeepers and NGOs, human rights, economic policies, advancement of women, refugees, ecological security, communications, and peace education. These recommendations are brought together in a concluding chapter and summarized in the appendix. Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies. Instead, their implementation would require creative efforts of Member States, secretariats, NGOs, and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life. This is stimulating reading for anyone who wants to be challenged to think creatively about the potential for coping with a growing array of global problems.

Unsettled Jordanna Bailkin, 2018-06-27 Today no one really thinks of Britain as a land of camps. Camps

seem to happen elsewhere from Greece to Palestine to the global South Yet over the course of the twentieth century dozens of British refugee camps housed hundreds of thousands of Belgians Jews Basques Poles Hungarians Anglo Egyptians Ugandan Asians and Vietnamese Refugee camps in Britain were never only for refugees Refugees shared a space with Britons who had been displaced by war and poverty as well as thousands of civil servants and a fractious mix of volunteers Unsettled Refugee Camps and the Making of Multicultural Britain explores how these camps have shaped today's multicultural Britain They generated unique intimacies and frictions illuminating the closeness of individuals that have traditionally been kept separate citizens and migrants but also refugee populations from diverse countries and conflicts As the world's refugee crisis once again brings to Europe the challenges of mass encampment Unsettled offers warnings from a liberal democracy's recent past Through lively anecdotes from interviews with former camp residents and workers Unsettled conveys the vivid everyday history of refugee camps which witnessed births and deaths love affairs and violent conflicts strikes and protests comedy and tragedy Their story like that of today's refugee crisis is one of complicated intentions that played out in unpredictable ways The aim of this book is not to redeem camps nor indeed to condemn them It is to refuse to ignore them Unsettled speaks to all who are interested in the plight of the encamped and the global uses of encampment in our present world

Practical Peacemaking in the Middle East Steve L. Spiegel, David J. Pervin, 2014-04-23 First published in 1995 Routledge is an imprint of Taylor Francis an informa company

Immigration and Asylum Matthew J. Gibney, Randall Hansen, 2005-06-21 A comprehensive and timely examination of the history and current status of immigrants and refugees their stories the events that led to their movement and the place of these movements in contemporary history and politics *Immigration and Asylum From 1900 to the Present* is an accessible and up to date introduction to the key concepts terms personalities and real world issues associated with the surge of immigration from the beginning of the 20th century to the present It focuses on the United States but is also the first encyclopedic work on the subject that reflects a truly global perspective With contributions from the world's foremost authorities on the subject *Immigration and Asylum* offers nearly 200 entries organized around four themes immigration and

asylum the major migrating groups around the world expulsions and other forced population movements and the politics of migration In addition to basic entries the work includes in depth essays on important trends events and current conditions There is no better resource for exploring just how profoundly the voluntary and forced movement of asylum seekers and refugees has transformed the world and what that transformation means to us today **Postcoloniality and Forced**

Migration Martin Lemberg-Pedersen, Sharla M. Fett, Lucy Mayblin, Nina Sahraoui, Eva Magdalena Stambøl, 2022-08-23 This powerful book explicates the many ways in which colonial encounters continue to shape forced migration ever evolving with times and various geographical contexts Bringing historians political scientists sociologists anthropologists and criminologists together the book presents examples of forced migration events and politics ranging from the 18th century to the practices and geopolitics of the present day These case studies covering Europe Africa North America Asia and South America are then put in dialogue with each other to propose new theoretical and real world agendas for the field As the pervasive legacies of colonialism continue to shape global politics this unprecedented book moves beyond critique ahistoricity and Eurocentrism in refugee and forced migration studies and establishes postcoloniality and forced migration as an important field of migration research Refugees, Security and the European Union Sarah Léonard, Christian Kaunert, 2019-06-07 This book analyses the extent and the modalities of the securitization of asylum seekers and refugees in the EU It argues that the development of the EU asylum policy far from securitizing asylum seekers and refugees has led to the strengthening and codification of several rights for these two categories of persons However the securitization of terrorism and the links that have been constructed between asylum irregular migration and terrorism in the wake of the various terrorist attacks that have taken place in Europe in the last few years have had a significant impact on the ability of asylum seekers to gain access to asylum systems in the EU From a theoretical point of view the book develops an original analytical framework that draws upon and further develops security studies more precisely securitization theory by connecting it to the literature on policy venues and venue shopping It therefore makes a significant contribution to the debates on both securitization and migration Empirically examining the entire development of the EU's policy towards asylum seekers and refugees from its origins in 1993 this book will be of great interest to students of European and EU politics refugees migration security terrorism and counter terrorism security studies and International Relations

Activism across Borders since 1870 Daniel Laqua, 2023-08-10 From the Occupy protests to the Black Lives Matter movement and school strikes for climate action the twenty first century has been rife with activism Although very different from one another each of these movements has created alliances across borders with activists stressing that their concerns are not confined to individual nation states In this book Daniel Laqua shows that global efforts of this kind are not a recent phenomenon and that as long as there have been borders activists have sought to cross them Activism Across Borders since 1870 explores how individuals groups and organisations have fostered bonds in their quest for political and social change and

considers the impact of national and ideological boundaries on their efforts Focusing on Europe but with a global outlook the book acknowledges the importance of imperial and postcolonial settings for groups and individuals that expressed far reaching ambitions From feminism and socialism to anti war campaigns and green politics this book approaches transnational activism with an emphasis on four features connectedness ambivalence transience and marginality In doing so it demonstrates the intertwined nature of different movements problematizes transnational action discusses the temporary nature of some alliances and shows how transnationalism has been used by those marginalized at the national level With a broad chronological perspective and thematic chapters it provides historical context clarifies terms and concepts and offers an alternative history of modern Europe through the lens of activists movements and campaigns **Resettlement as**

Protection Marjoleine Zieck,2024-09-06 This timely book focuses on one of the so called durable solutions to the problem of refugees that UNHCR has been charged to pursue resettlement Resettlement consists of the transfer of refugees from their country of asylum to another state in case of severe protection problems in the country of asylum States are not obliged to offer resettlement places and in practice that means that resettlement is run as a discretionary immigration scheme This book attempts to integrate resettlement in international refugee law Racism After 'race Relations' Robert Miles,1993

Discusses the shifting definitions of racism and challenges the common conception that racism is experienced exclusively by black people The book aims to occupy the centre of debate on the sociology of racism and ethnic studies *Property and Civil Society in South-Western Germany 1820-1914* Jonathan Sperber,2005-09-22 Historians have often employed the concept of civil society an intermediary realm between the family and the state to analyse nineteenth century Europe and North America They have concentrated on voluntary associations the press and public meetings the constituent elements of Jürgen Habermas's public sphere in doing so overlooking a central element of nineteenth century civil society property and its disposition whether within the family or in the marketplace This book examines the place of property in the society of south western Germany during property's nineteenth century golden age It analyses the culture of property ownership and property transactions within families among business partners and competitors and among creditors and debtors The work considers the boundaries of property outlining relationships between neighbouring property owners and showing how property ownership helped shape social distinctions between men and women Christians and Jews the upper and lower classes the sane and the insane and between honourable and dishonourable actions It traces the development of property relations and property transactions from the end of the Napoleonic era to the eve of the First World War The book's conclusion compares conditions in south western Germany with those elsewhere in Europe and North America and considers changes in property relations occurring in Germany during the age of total war and in the post 1945 period in the light of structures and developments in the nineteenth century Based on extensive documentation from civil court records *Property and Civil Society in South Western Germany* presents its results through the recounting of intriguing sometimes bizarre but

always revealing stories of legal disputes A reconsideration of the nature of civil society an analysis of nineteenth century social development and social conflict a study of the nature and action of the law in everyday life the book is also an ironic and bemused look at the past human condition **Refugees and Cultural Transfer to Britain** Stefan Manz, Panikos Panayi, 2013-10-18 This book is the first to focus specifically upon the relationship between refugees and intercultural transfer over an extensive period of time Since circa 1830 a series of groups have made their way to Britain beginning with exiles from the failed European revolutions of the mid nineteenth century and ending with refugees who have increasingly come from beyond Europe The book addresses four specific questions First what roles have individuals or groups of refugees played in cultural and political transfers to Britain since 1830 Second can we identify a novel form of cultural production which differs from that in the homeland Third to what extent has dissemination within and transformation of the receiving culture occurred Fourth to what extent do refugee groups themselves undergo a process of cultural restructuring The coverage of the individual essays ranges from high culture through politics and everyday practices The volume moves away from general perceptions of refugees as problem groups and rather focuses on the way they have shaped and indeed enriched British cultural and political life This book was previously published as a special issue of *Immigrants and Minorities*

Outsiders Panikos Panayi, 1998-07-01 The oppression of minorities has been a theme in the history of Europe It has been a cause of dispute over territory often resulting in war With nation states demanding undivided loyalty of its citizens there has been discrimination and racism which has often led to persecution at its most extreme in the Nazi crusade against the Jews This is a history of European minority communities It deals with the dispersed minorities the Jews and the gypsies as well as the muslims of the Balkans and the diaspora of Germans in eastern Europe from the Middle Ages to 1945 Almost all countries have disadvantaged ethnic and linguistic minorities whether minorities without their own states such as the Breton Scots Vlachs and Kurds or those such as the Russians in Estonia or the Greeks in Turkey who form linguistic groups different from the native majorities During wars the existence of alien communities often led to persecution in turn bringing huge refugee migrations The result has been the resettlement of European populations Since World War II the demand for cheap labour has led to an influx of immigrants from outside Europe This followed a wave in which workers from the poor Mediterranean countries travelled north to industrial heartlands Although all EEC countries now operate strict controls on immigrants there is pressure from the east following the fall of Communism and from the Third World where birth rates outstrip that of Europe The existence of this pressure is a determinant of Europe s history in the 21st century

Encyclopedia of Diasporas Melvin Ember, Carol R. Ember, Ian Skoggard, 2004-11-30 Immigration is a topic that is as important among anthropologists as it is the general public Almost every culture has experienced adaptation and assimilation when immigrating to a new country and culture usually leaving for what is perceived as a better life Not only does this diaspora change the country of adoption but also the country of origin Many large nations in the world have absorbed and

continue to absorb large numbers of immigrants The foreseeable future will see a continuation of large scale immigration as many countries experience civil war and secessionist pressures Currently there is no reference work that describes the impact upon the immigrants and the immigrant societies relevant to the world s cultures and provides an overview of important topics in the world s diasporas The encyclopedia consists of two volumes covering three main sections Diaspora Overviews covers over 20 ethnic groups that have experienced voluntary or forced immigration These essays discuss the history behind the social economic and political reasons for leaving the original countries and the cultures in the new places Topics discusses the impact and assimilation that the immigrant cultures experience in their adopted cultures including the arts they bring the struggles they face and some of the cities that are in the forefront of receiving immigrant cultures Diaspora Communities include over 60 portraits of specific diaspora communities Each portrait follows a standard outline to facilitate comparisons The Encyclopedia of Diasporas can be used both to gain a general understanding of immigration and immigrants and to find out about particular cultures topics and communities It will prove of great value to researchers and students curriculum developers teachers and government officials It brings together the disciplines of anthropology social studies political studies international studies and immigrant and immigration studies The Great World War, 1914-45: Lightning strikes twice Peter Liddle,J. M. Bourne,Ian R. Whitehead,2000
