Regenerating Agriculture An Alternative Strategy For Growth:

Regenerating Agriculture Jules N. Pretty, 1994 Regenerating Agriculture Jules N. Pretty, 2013-11-05 For the past 50 years the main goal of agriculture has been to increase production at any price using high amounts of fertilizers and pesticides and intensive industrial methods This has caused damage to the environment and widespread rural depopulation This study shows that there is a viable alternative a form of agriculture which conserves resources maintains rural employment and minimizes the external costs without loss of productivity Using case studies from industrialized and developing countries the author describes the new technical institutional and policy options available **Regenerating Agriculture** Jules N. Pretty, 1995 The author looks at the challenge facing agriculture today and details the concepts and characteristics of alternative sustainable agricultural practices Empirical evidence from a diverse range of agro ecological and community setting show the impact of more sustainable practices In addition existing policy frameworks and institutional processes are considered and alternatives which are known to work are presented **Sustainable Development** David Reid, 2013-11-05 Sustainable development is the catchphrase of the 1990s Governments around the world international institutions local organizations and NGOs have committed themselves to its principles and have adopted policies to promote it But sustainable development is difficult to define let alone implement and its proponents and advocates may all interpret it in very different ways This introductory guide provides a clear and accurate account of what sustainable development actually is David Reid gives an overview of the history of the concept and how it has evolved in recent years describes the obstacles to achieving sustainable development and looks at recent progress towards implementing it and at how much we have still to do Smart Agrochemicals for Sustainable Agriculture Katarzyna Chojnacka, Agnieszka Saeid, 2021-12-01 Smart Agrochemicals for Sustainable Agriculture proposes products that fulfill the need for chemicals that provide a sustainable delivery system for nutrients necessary to maximize the production of agricultural animals and plants while producing the smallest possible environmental footprint This book addresses all aspects related to the production process including chemical formulas stability of formulations and the application of the effect of its utilization Over the past decade biobased chemicals have received significant attention as candidate resource materials in fertilizers and agrochemicals production due to their renewability Substitution of conventional raw materials with biobased requires a new approach towards the development of technology On the other hand the use of biobased chemicals such as biostimulants bioregulators and biofertilizers offers a new palette of products that are natural thus their application does not pose an impact on the environment residues or cultivated plants Presents ideas for new products that provide appropriate nutrition while limiting environmental footprints Includes a full range of the production process from chemical formulas to establishing the stability of formulations applications and effects Offers a host of new products that are natural and whose applications do not negatively impact the environment nor cultivated plants Strategic Public Relations in Emerging Economies Genevieve

Bosah, Robert E. Hinson, Eric Kwame Aday, 2025-09-15 This book examines the nuances of public relations in the developing world Offering a comprehensive exploration description analysis and explanation of diverse PR strategies tactics and challenges authors draw on insights from both the public and private sectors of developing societies The chapters explore the unique cultural nuances socio political contexts and emerging trends that continue to shape PR practices in emerging economies The book examines how to effectively navigate complex regulatory environments build strong relationships with publics and leverage innovative communication strategies to achieve impactful results in the public and private sectors This must have book provides valuable insights into the challenges and opportunities facing PR professionals in emerging markets

Water Crises and Sustainable Management in the Global South Sylvester Chibueze Izah, Matthew Chidozie

Ogwu, Athanasios Loukas, Hossein Hamidifar, 2024 Zusammenfassung This book is a reference material on how to sustainably manage water crises The causes and effects of water crises under different regions in the Global South are explored in this book Approaches for the sustainable management of water crises are also highlighted in the book especially in the Global South where the level of technologies available for sustainable management of water are limited Water crisis is a global problem but with disproportionate higher consequences in the Global South About 25% of the global population resides in water stressed countries and about 10% of the world population lives in areas with high water vulnerability Furthermore many millions of people across the globe lack access to potable water supplies As such many people could be displaced by water crises or scarcity shortly The effects of the water crisis on the environment include increased salinity nutrient pollution the loss of floodplains the drying of riverbeds the loss of habitat wetlands disappearing and ecosystem loss On the human level it could lead to disease outbreaks drought famine and death This may have more severe effects in countries in the Global South as compared to nations in the Global North This is because the water cycle is very intense in Asia and Africa which are important areas in the Global South This book is of interest and useful to aquatic toxicologists water quality experts practitioners trainees and trainers environmentalists biological sciences scientists academics researchers students especially undergraduates and postgraduates libraries and other public knowledge repositories interested in novel and advanced practices in sustainable water management

Exploring Synergies and Trade-offs between Climate Change and the Sustainable Development Goals V. Venkatramanan, Shachi Shah, Ram Prasad, 2020-11-16

The existential environmental crisis prompted the United Nations to formulate the Millennium Development Goals at the turn of the 21st century in order to embark on an era of sustainable development The progress and deficiencies in achieving the Millennium Development Goals provided impetus to the intelligentsia and policymakers to map out the pertinent goals for a sustainable growth trajectory for humanity and the planet The United Nations 2030 Agenda for Sustainable Development which was adopted in September 2015 took the shape of 17 Sustainable Development Goals SDGs and 169 targets In effect the 17 Sustainable Development Goals focus on protecting the earth's life support systems for intra and inter generational equity

and for development that is rooted in sustainability science Attaining these goals is an uphill task nevertheless scientific knowledge trans and interdisciplinary inquiries concerted global action and capacity building would provide an enabling environment for achieving the SDGs This book explores the synergies and trade offs between climate change management and other SDGs It highlights the policy imperatives as well as the interrelations between combating climate change and its impacts SDG 13 and food and nutritional security SDG 2 water security SDG 6 soil security SDG 15 energy security SDG 7 poverty eradication SDG 1 gender equality SDG 5 resilient infrastructure SDG 9 and sustainable and resilient cities SDG 11

Inhabitable Infrastructures CJ Lim, 2017-05-25 Inhabitable Infrastructures Science fiction or urban future the follow up to Food City and Smartcities and Eco Warriors from one of the world's leading urban design and architectural thinkers explores the potential of climate change related multi use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi use infrastructures and integrated self sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio politics

Planning Sustainability Michael Kenny, James Meadowcroft, 2002-01-31 Environmental sustainability has become one of the most salient issues on the policy agenda of nation states This book argues that planning is seldom credited by advocates of environmental politics The authors leading scholars in the field explore the relationship between environmental sustainability one of the most important innovations in recent political discourse and planning an idea which has slipped from public attention recently

Continuous Living Cover: Adaptive Strategies for Putting Regenerative Agriculture into Practice Jacob Jungers, Jose G. Franco, Ashley Conway, Carol Williams, E. Britt Moore, 2023-12-18 Regenerative Agriculture for Sustainable Food Systems Sandeep Kumar, Ram Swaroop Meena, Parvender Sheoran, Manoj Kumar Jhariya, 2024-10-24 This book aims to present a comprehensive collection of information that combines improved soil and crop productivity climate based stress management enhanced research infrastructure financial assistance for regenerative technologies and government subsidies and economic incentives Considering the importance of soil biodiversity health and ecological balance this book primarily focuses on effective plans and policies for soil management and restoration in

agricultural soils The book covers key areas such as advancing communication strategies to ensure subsidies and incentives for carbon sequestering farm practices and effectively publicizing the benefits of soil carbon health and regenerative practices It also includes the declaration of rules and regulations to guide policies programs and investments in green technologies for soil restoration and ecosystem services and forming a robust virtual network among farmers land managers and their associations to prepare action plans and seek available funding for regenerative farm practices and technologies Additionally it promotes research and developmental activities on carbonaceous practices and land use decisions across various agro ecological regions and soil types The central theme emphasizes that maintaining the ecological balance of soil plants the environment and health is crucial for a healthier life and serves as a powerful tool in combating climate change food and nutritional insecurities and other environmental concerns This book is suitable for teachers researchers scientists government planners policymakers and students of agricultural sciences It will also interest national and international climate change scientists extension workers and capacity builders

Biological Approaches to Regenerative Soil Systems Norman Uphoff, Janice E. Thies, 2023-10-27 Agriculture in the 21st century will need considerable modification to remain both productive and sustainable Greater production is needed to meet the needs of our still growing populations and to combat hunger and poverty Declines in soil health and the pollution of water sources are making many of our production systems less tenable These adverse trends are exacerbated more and more by the impacts of climate change There are fortunately alternative methods available for agricultural practice that can countervail these constraints Biological Approaches to Regenerative Soil Systems brings together the work of both researchers and practitioners to map out better approaches to contemporary agriculture that draw upon both old and new knowledge It presents the science that underlies more biologically driven strategies as well as contemporary innovative experiences in diverse parts of the world Both accepted research and these varied experiences encourage confidence that these approaches not relying primarily on the introduction of new varieties and on exogenous inputs can succeed This book updates and revises a preceding volume Biological Approaches to Sustainable Soil Systems published by CRC Press in 2006 So much has been learned and done on this subject in the past decade and a half that a second edition was warranted For instance the first edition was published knowledge about plant soil microbiomes which are a frequent focus in this book has mushroomed Because sustainability is a broad term and an end state the editors preferred to assemble expertise regarding regenerative agriculture which is concerned with the means for achieving sustainability The concept of regenerative soil systems entities that are more complex and multifaceted than soil alone also incorporates a concern with having more resilient agricultural systems ones that are better able to cope with the multiple stresses of climate change that are foreseen for the decades ahead The book's chapters representing a wide range of disciplines were contributed by 84 scientists and practitioners from 20 countries Although they come from persons with in depth knowledge of their respective fields the chapters are written to be accessible

to readers who are not trained in the specialized subjects Taken together the chapters provide students researchers practitioners planners and policy makers with a comprehensive understanding of both the science and the steps needed to regenerate and sustain soil systems around the world for the long term benefit of humankind and the environment

A Just Transition to a Low Carbon Future in South Africa Ngobile Xaba,Saliem Fakir,2022-02-01 Deliberations on the just transition in South Africa have intensified and will continue to do so for the next few years and decades Climate change widening socio economic inequality the precarious future of work and emergent approaches to financing arrangements have brought new urgency to the issues It therefore remains critical to interrogate how South Africa can ensure a just transition to a low carbon economy This book underlines the fact that the low carbon transition in South Africa has to grapple with complex historical social economic cultural and political factors The main message is that the transition to a low carbon society is possible but it can only succeed if it is just and handled collaboratively In addition the book aims to broaden the discourse on low carbon transition and explore the opportunities in and impediments to making the transition fair affordable and socio economically viable

Growth and Development in Plants (Textbook Series: 21st Century Biology and Agriculture) K.V. Krishnamurthy,2015-06-01 The topic of the book is covered at the cellular tissue organ and organism levels and inputs from all these hierarchical levels of plant organization have been carefully integrated to get a holistic picture of growth and development in plants The book will be useful to undergraduate post graduate and research students and teachers of botany plant sciences plant biotechnology agriculture and forestry
