Welfare Research Fiona William,Jennie Popay,Ann Oakley,2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications
