Patricia Johanson and the Re-invention of Public Environmental Art, 1958-2010 Xin Wu, 2013 Impeccably researched and richly detailed this book addresses the issue of translation between visual arts and landscape design in the 50 year career of American painter and environmental artist Patricia Johanson Exploring the artist's search for an art of the real as a member of the postwar New York art world it demonstrates that visual translation cannot be understood solely

through the works of art instead attention must be paid to the process of creation This book is an insightful attempt to confront a crucial question in the history of art through the work of a contemporary artist **Great City Parks** Alan Tate,2015-03-05 Great City Parks is a celebration of some of the finest achievements of landscape architecture in the public realm It is a comparative study of thirty significant public parks in major cities across Western Europe and North America Collectively they give a clear picture of why parks have been created how they have been designed how they are managed and what plans are being made for them at the beginning of the twenty first century Based on unique research including extensive site visits and interviews with the managing organisations this book is illustrated throughout with clear plans and photographs with this new edition featuring full colour throughout Tate updates his seminal 2001 work with 10 additional parks including The High Line in NYC Golden Gate Park in San Francisco and Westergasfabriek Amsterdam All the previous city parks have also been updated and revised to reflect current usage and management This book reflects a belief that well planned well designed and well managed parks and park systems will continue to make major contributions to the quality of life in an increasingly urbanized world **Public Space Design and Social Cohesion** Patricia Aelbrecht,Quentin Stevens,2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter **Social Urbanism and the Politics of Violence** K.
