[Italy](#) Diane Ghirardo,2013-02-15 Packed in its dense historic city centers Italy holds some of the most prized architecture and art in the world with which planners and politicians have had to negotiate as they struggle to cope with massive migration from the countryside to the city Early modern architecture coincided with a sustained drive to transform a country that was still primarily rural into a modern

industrial state and throughout the twentieth century architects in Italy have attempted to define the role of architecture within a capitalist economy and under diverse political systems In Italy Modern Architectures in History Diane Yvonne Ghirardo addresses these and other issues in her analysis of the last century of Italy's building practices Specifically she examines the post unification efforts to identify a distinctly Italian architectural language as well as the transformation of the urban environment in Italian cities undergoing industrialization in the late nineteenth and early twentieth centuries She challenges received interpretations of modern architecture and also looks at the subject of illegal building and current responses to ecological challenges In order to illuminate the full scope of the building industry in Italy her examples are drawn not only from the work of widely published architects in the largest cities but from throughout the peninsula including small towns and rural areas Insightful reading for those interested in Italian culture this book offers a new way of understanding the architectural history of modern Italy

Utopias and Architecture Nathaniel Coleman, 2007-05-07

Utopian thought though commonly characterized as projecting a future without a past depends on golden models for reinvention of what is Through a detailed and innovative reassessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Materan Contradictions Anne Parmly Toxey, 2016-05-06 Shaped by encrusted layers of development spanning millennia the southern Italian city of Matera is the ultimate palimpsest Known as the Sassi the majority of the ancient city is composed of thousands of structures carved into a limestone cliff and clinging to its walls The resultant menagerie of forms possesses a surprising visual uniformity and an ineffable allure Conversely in the 1950s Matera also served as a crucible for Italian postwar urban and architectural theory witnessed by the Neorealist modernist expansion of the city that developed in aversion to the Sassi In another about face the previously disparaged cave city has now been recast as a major tourist destination UNESCO World Heritage Monument and test subject for ideas and methods of preservation Set within a sociopolitical and architectural history of Matera from 1950 to the present this book analyses the contemporary effects of preservation on the city and surrounding province More broadly it examines the relationship between and interdependence of preservation and modernism within architectural thought To understand inconsistencies inherent to preservation in particular its effect of catalyzing change the study lays bare planners and developers use of preservation especially for economic goals and political will The work asserts that preservation is not a passive curatorial pursuit it is a cloaked manifestation of modernism and a powerful tool often used to control economies The study demonstrates that preservation also serves to influence societies
