Reorganizing Americas Defense Leadership In War And Peace:

Reorganizing the Joint Chiefs of Staff Gordon Lederman, 1999-11-30 The Goldwater Nichols Department of Defense Reorganization Act of 1986 is the most important legislation to affecting U S national defense in the last 50 years This act resulted from frustration in Congress and among certain military officers concerning what they believed to be the poor quality of military advice available to civilian decision makers It also derived from the U S military s perceived inability to conduct successful joint or multi service operations The act passes after four years of legislative debate designated the Chairman of the Joint Chiefs of Staff as the principal military advisor to the President and sought to foster greater cooperation among the military services Goldwater Nichols marks the latest attempt to balance competing tendencies within the Department of Defense namely centralization versus decentralization and geographic versus functional distributions of power As a result of the Goldwater Nichols Act the Chairman of the Joint Chiefs has achieved prominence but his assignment is somewhat contradictory the spokesman and thus the advocate for the Commander in Chief while simultaneously the provider of objective advice to the President While the act did succeed in strengthening the CINCs authority and in contributing to the dramatic U S achievements in the Gulf War the air and ground campaigns revealed weaknesses in the CINCs capability to plan joint operations In addition the increased role of the military in ad hoc peacekeeping operations has challenged the U S military s current organizational structure for the quick deployment of troops from the various services Rapid technological advances and post Cold War strategic uncertainty also complicate the U S military s organizational structure *Air University Library Index to Military Periodicals* ,1987

since its founding in 1905 **Foregone Conclusions** James H. Lebovic, 2019-04-08 With the end of the Cold War and the erosion of the Soviet threat the United States is reevaluating its defense policy and its acquisition of weapons James Lebovic shows that although current military missions are adapted to post Cold War realities the self defeating bias of bureaucrats and military services toward Cold War weaponry is still prevalent He examines the impact of this bias on the armed services as they assess threat generate requirements develop and change weapon concepts set production rates and engage in testing The author asserts that bias compromises service interests and broader military objectives and he offers general policy recommendations to put U S weapons acquisition on a more effective track *Only the Most Able* Stephen M. Duncan, 2012-10-05 The nature of the threats facing America today has drastically reduced the margin for error in senior political appointments In *Only the Most Able* Stephen M Duncan draws on a lifetime of military public service executive and legal experience to critique the political appointment process focusing on departments that deal with national security the Department of Defense and the Department of Homeland Security He looks at how the current methods for making appointments put people in positions for which they are not qualified and not prepared Rather he argues appointments should be made on the basis of one s qualifications and merits those who lead our military should be people with military experience and those who must make executive decisions should be people who have served and excelled in an executive capacity Identifying the successful traits of leaders such as Winston Churchill General George Marshall nationally known business executives and others Duncan argues with unusual insight and candor why the quality and performance of senior political appointees who are charged even in part with the nation s security must be improved and offers specific recommendations on how this can be accomplished This timely book will appeal to Americans of all political persuasions as well as those with particular interests in political and military history *Clausewitz and Escalation* Stephen J. Who Guards the Guardians and How Thomas C. Bruneau, Scott D. Tollefson, 2009-06-03 The continued spread of democracy into the twenty first century has seen two thirds of the almost two hundred independent countries of the world adopting this model In these newer democracies one of the biggest challenges has been to establish the proper balance between the civilian and military sectors A fundamental question of power must be addressed who guards the guardians and how In this volume of essays contributors associated with the Center for Civil Military Relations in Monterey California offer firsthand observations about civil military relations in a broad range of regions including Latin America Africa Asia and Eastern Europe Despite diversity among the

consolidating democracies of the world their civil military problems and solutions are similar soldiers and statesmen must achieve a deeper understanding of one another and be motivated to interact in a mutually beneficial way The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the use of force within a society while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors Although these essays address a wide variety of institutions and situations they each stress a necessity for balance between democratic civilian control and military effectiveness

Cooperation and Discord in U.S.-Soviet Arms Control Steve Weber, 2014-07-14 If international cooperation was difficult to achieve and to sustain during the Cold War why then were two rival superpowers able to cooperate in placing limits on their central strategic weapons systems Extending an empirical approach to game theory particularly that developed by Robert Axelrod Steve Weber argues that although nations employ many different types of strategies broadly consistent with game theory's tit for tat only strategies based on an ideal type of enhanced contingent restraint promoted cooperation in U S Soviet arms control As a theoretical analysis of the basic security behaviors of states the book has implications that go beyond the three bilateral arms control cases Weber discusses implications that remain important despite the end of superpower rivalry An important theoretical analysis of cooperation between the U S and the Soviet Union in the area of arms control An excellent work on a subject that has received very little attention Choice

Trillions for Military Technology J. Alic, 2007-09-03 Trillions for Military Technology explains why the weapons purchased by the U S Department of Defense cost so much why it takes decades to get them into production even as innovation in the civilian economy becomes ever more frenetic and why some of those weapons don't work very well despite expenditures of many billions of dollars It also explains what do about these problems The author argues that the internal politics of the armed services make weapons acquisition almost unmanageable Solutions require
