Gould was an early broadcaster on the BBC's Children's Hour when with his encyclopaedic knowledge he became known as The Man Who Knew Everything. Not surprisingly he was also part of that elite group on BBC radio who formed The Brains Trust giving on the spot answers to all manner of wide ranging and difficult questions. With his wide learning and photographic memory Gould awed a national audience becoming one of the era's radio celebrities. During the 1920s Gould restored the complex and highly significant marine timekeepers constructed by John Harrison 1693-1776 and wrote the unsurpassed classic *The Marine Chronometer: its History and Development*. Today he is virtually unknown, his horological contributions scarcely mentioned in Dava Sobel's bestseller *Longitude*. The TV version of *Longitude* in which Jeremy Irons played Rupert Gould did at least introduce Gould's name to a wider public. Gould suffered terrible bouts of depression resulting in a number of nervous breakdowns. These coupled with his obsessive and pedantic nature led to a scandalously reported separation from his wife and cost him his family, his home, his job and his closest friends. In this first ever biography of Rupert Gould, Jonathan Betts, the Royal Observatory Greenwich's Senior Horologist, has given us a compelling account of a talented but flawed individual. Using hitherto unknown personal journals, the family's extensive collection of photographs and the polymath's surviving records and notes, Betts tells the story of how Gould's early life, his naval career and his celebrity status came together as this talented Englishman restored part of Britain's and the world's most important technical heritage: John Harrison's marine timekeepers.

*Kovel's Guide to Selling, Buying, and Fixing Your Antiques and Collectibles* Ralph M. Kovel, Terry H. Kovel, 1995. The hard to find information sources and addresses that collectors need for repairing, caring for and finding buyers for antiques and collectibles are all in this book. To gather the information for this book, Ralph and Terry Kovel contacted more than 3,000 suppliers, clubs, auctions, services and other industry sources around the country, making this the most up to date and complete reference of its kind.

*Chats on Old Clocks* Arthur Hayden, 2021-05-19. In *Chats on Old Clocks*, Arthur Hayden immerses readers in the intricate world of horology, exploring the history, craftsmanship and cultural significance of timepieces. Written in an engaging and conversational style, the book blends scholarly research with personal anecdotes, offering a rich tapestry of stories that span centuries. Hayden's work serves not only as a tribute to clocks but also as a reflection on human civilization's relationship with time, making it a valuable addition to the canon of historical narrative and material culture studies. Arthur Hayden, a passionate antiquarian and collector, was deeply influenced by the Victorian era's fascination with both technology and artistry, which is palpable throughout this text. His background in art history and his extensive knowledge of mechanical devices afford him a unique perspective that resonates in his writing. Hayden's enthusiasm for preservation of craftsmanship is evident as he seeks to elevate the status of timepieces from mere tools of measurement to revered art forms. *Chats on Old Clocks* is recommended for enthusiasts of history, craftsmanship and those seeking a deeper understanding of the intrinsic value of timekeeping. Hayden's work will resonate with collectors, historians and literary aficionados alike, offering insight into a bygone era that continues to influence our lives. Kovels'
