European Representation in EU National Parliaments Lucy Kinski, 2021-01-02 This book provides an original argument that rejects the idea of national MPs having but one standard mode of representation It acknowledges the national electoral connection but considers representation beyond national borders The author empirically investigates such patterns of representation in MPs parliamentary speech making behavior and their attitudes in Austria Germany Ireland

and the UK The book analyzes representative claims in parliamentary debates on the Constitutional Treaty the Lisbon Treaty and the Eurozone crisis and relies on qualitative interviews with members of the European affairs and budget committees It finds a Eurosceptic Europeanization in that national MPs from the Eurosceptic left particularly represent other EU citizens

Citizens and the State Hans-Dieter Klingemann, Dieter Fuchs, 1995-11-23 Fears that representative democracy in western Europe is in crisis are examined on the basis of trends in mass attitudes over the past two or three decades The evidence suggests not crisis but a changing relationship between citizens and the state This change poses a democratic transformation in the countries of Western Europe Series Description This set of five volumes is an exhaustive study of beliefs in government in post war Europe Based upon an extensive collection of survey evidence the results challenge widely argued theories of mass opinion and much scholarly writing about citizen attitudes towards government and politics The series arises from a research project sponsored by the European Science Foundation Series ISBN 0 19 961880 1 *The Catholic Church and European State Formation, AD 1000-1500* Jørgen Møller, Jonathan Stavnskaer Doucette, 2022 The Catholic Church and European State Formation AD 1000 1500 inserts the Catholic Church as the main engine of the persistent international and domestic power pluralism which has moulded European state formation for almost a millennium **Referendums and**

work the writings collected in this volume attest to the broad scope and depth of Mair's insights into comparative party politics and the changing realities of party government. As such they form an important and enduring contribution to the study of politics and a fitting tribute to an inspirational and much missed figure in the global political science community. Edited and introduced by Ingrid van Biezen with an intellectual portrait of Peter Mair by Stefano Bartolini and Hans Daalder.

European Federations Joanne B. Brzinski, Thomas D. Lancaster, Christian Tuschhoff, 1999. These papers resulted from a research project entitled *Federalism and Compounded Representation in Western Europe*. Parliaments and Citizens in Western Europe Philip Norton, 2020-07-24. Citizens elect the parliament but what contract takes place between citizen and parliament in between elections? The authors assess the extent and nature of that contact. To what extent are members of parliament accessible to the ordinary citizen? And what are the implications for the legislature? Can there be too much or too little contact? *The Oxford Handbook of Political Representation in Liberal Democracies* Robert Rohrschneider, Jacques Thomassen, 2020-07-28. The *Handbook of Political Representation in Liberal Democracies* offers a state of the art assessment of the functioning of political representation in liberal democracies. In 34 chapters the world's leading scholars on the various aspects of political representation address eight broad themes: The concept and theories of political representation; its history and the main requisites for its development; elite orientations and behavior; descriptive representation; party government and representation; non-electoral forms of political participation and how they relate to political representation; the challenges to representative democracy originating from the growing importance of non-majoritarian institutions and social media; the rise of populism and its consequences for the functioning of representative democracy; the challenge caused by economic and political globalization; what does it mean for the functioning of political representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people. The various chapters offer a comprehensive review of the literature on the various aspects of political representation. The main organizing principle of the *Handbook* is the chain of political representation: the chain connecting the interests and policy preferences of the people to public policy via political parties, parliament and government. Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research. Comparative

research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different
