Birth Passages Theresa M. Krier, 2001 Birth Passages offers a provocative and eloquent challenge to the nostalgia for the maternal sometimes influenced by classic Freudian theory which pervades many discourses Theresa M Krier suggests an alternative to the common characterizations of the maternal as a force inspiring both desire and dread a force that must be repressed if subjectivity and culture are to be established Instead drawing on the work of Melanie Klein D W Winnicott and Luce Irigaray Krier seeks to establish a new model of the relationship between mother and infant one in which birth is seen not as the tragic ending to the prenatal union but rather as the child s claiming both distance from and proximity to this parent Krier s insightful readings of poetic works from antiquity the Middle Ages and the Renaissance show these texts in opposition to their cultures insistent nostalgia for the maternal Their authors she maintains recognize such longing as a symptom of a glamorous but false and disabling fantasy In her analysis of the Song of Songs Lucretius s De rerum natura Chaucer s Parlement of Foules Spenser s Amoretti and Faerie Queene and Shakespeare s Love s Labor s Lost and The Winter s Tale Krier details how the writings represent the intersubjective nature of birth

Children and Childhood in Western Society Since 1500 Hugh Cunningham, 2020-06-10 Updated to incorporate recent scholarship on the subject this new edition of Hugh Cunningham s classic text investigates the relationship between ideas about childhood and the actual experience of being a child and assesses how it has changed over the span of 500 years Through his engaging narrative Hugh Cunningham tells the story of the development of ideas from the Renaissance to the present revealing considerable differences in the way Western societies have understood and valued childhood over time His survey of parent child relationships uncovers evidence of parental love care and in the frequent cases of child death grief throughout the period concluding that there was as much continuity as change in the actual relations of children and adults across these five centuries Since the book s first publication in 1995 the volume of historical research on children and childhood has escalated hugely and is testimony to the level of concern provoked by the dominance of the negative narrative that originated in the 1970s and 1980s A new epilogue revisits the volume from today s perspective analysing why this negative narrative

established dominance in Western society and considering how it has affected historical writing about children and childhood enabling the reader to put both this volume and recent debates into context Supported by an updated historiographical discussion and expanded bibliography *Children and Childhood in Western Society since 1500* remains an essential resource for students of the history of childhood the history of the family social history and gender history **Parenting** George W. Holden, 2014-10-10 Written from a psychological perspective while integrating cross disciplinary viewpoints this fully updated Second Edition takes a parent centered approach to exploring topics such as the reasons behind parental behavior the effect parents and children have on one another and social policy's ability to help families Including the latest statistics on family functioning and with coverage of contemporary issues George Holden's *Parenting* conveys the process of parenting in all its complexities **A Bishop's Tale** Craig Harline, Eddy Put, 2008-10-01 This absorbing book takes us back to the busy colorful world of a Netherlandish Catholic bishop and his flock during the age of Reformation It is drawn from a rare journal one of many kept by Mathias Hovius from 1596 to 1620 while he was Archbishop of Mechelen part of modern Belgium Elegantly written the book focuses not only on the life of Mathias Hovius but also on key events and characters of his time it portrays lived religion so that we see people from all sides getting involved in the constant negotiation of what it meant to be a good Catholic Craig Harline and Eddy Put recreate the eventful life and times of Mathias Hovius a world in which other believers were outright heretics the nagging fevers of old age were the result of unbalanced bodily humors and a corruptible earth rested motionless at the center of the universe while God sat exalted on a throne just beyond the fixed stars The authors also tell the stories of monks nuns priests millers pilgrims peasant women saints town and village councils and ordinary parishioners each story fascinating in its own right illustrates a major theme in the history of the Catholic Reformation In the end Harline and Put have painted a picture teeming with life and energy *Childhood in the Middle Ages and the Renaissance* Albrecht Classen, 2011-12-22 Earlier theses on the history of childhood can now be laid to rest and a fundamental paradigm shift initiated as there is an overwhelming body of evidence to show that in medieval and early modern times too there were close emotional relations between parents and children The contributors to this volume demonstrate conclusively on the one hand how intensively parents concerned themselves with their children in the pre modern era and on the other which social political and religious conditions shaped these relationships These studies in emotional history demonstrate how easy it is for a subjective choice of sources coupled with faulty interpretations caused mainly by modern prejudices toward the Middle Ages in particular to lead to the view that in the past children were regarded as small adults The contributors demonstrate convincingly that intense feelings admittedly often different in nature shaped the relationship between adults and children **Beyond the Century of the Child** Willem Koops, Michael Zuckerman, 2012-10-30 In 1900 Ellen Key wrote the international bestseller *The Century of the Child* In this enormously influential book she proposed that the world's children should be the central work of society during the twentieth century

Although she never thought that her century of the child would become a reality in fact it had much more resonance than she could have imagined The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key s time For the past half century the study of the child has been dominated by two towering figures the psychologist Jean Piaget and the historian Philippe Ari s Interest in the subject has been driven in large measure by Ari s s argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child Piaget proposed that children s logic and modes of thinking are entirely different from those of adults In the twentieth century this distance between the spheres of children and adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays *Beyond the Century of the Child* considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end **Crying in the**

Middle Ages Elina Gertsman, 2012-02-20 Sacred and profane public and private emotive and ritualistic internal and embodied medieval weeping served as a culturally charged prism for a host of social visual cognitive and linguistic performances *Crying in the Middle Ages* addresses the place of tears in Jewish Christian and Islamic cultural discourses providing a key resource for scholars interested in exploring medieval notions of emotion gesture and sensory experience in a variety of cultural contexts Gertsman brings together essays that establish a series of conversations with one another foregrounding essential questions about the different ways that crying was seen heard perceived expressed and transmitted throughout the Middle Ages In acknowledging the porous nature of visual and verbal evidence this collection foregrounds the necessity to read language image and experience together in order to envision the complex notions of medieval crying

Medicine and Religion c.1300 Joseph Ziegler, 1998-07-09 This book takes a fresh look at the cultural role of medicine among learned people around 1300 It was at this time that learned medicine came to be fully incorporated into the academic system and began to win greater social acceptance Joseph Ziegler argues that physicians and clerics did not confine the role of medicine to its physical therapeutic function and that fusion rather than disjunction characterized the relationship between medicine and religion at that time Much of this argument relies on language analysis and on a close study of unedited manuscript sources By juxtaposing the spiritual writings and the medical output of two learned physicians Arnau de Vilanova c 1238 1311 and Galvano da Levanto fl 1300 Dr Ziegler shows that they saw a medical purpose namely to ensure

the spiritual health of their audience and to reveal the mysteries of God and creation. When entering the spiritual realm, both brought to it a medical framework and extended their medical knowledge and curative activities from body to soul. By examining preachers' manuals and sermons, the author suggests that a growing tendency emerged among clerics in general and preachers in particular to appropriate current medical knowledge for spiritual purposes and to substantiate their extensive use of medical metaphors, analogies, and exempla by citing specific medical authorities.
