## **Rescuing Capitalist Free Enterprise For The Twenty First Century:**

Rescuing Capitalist Free Enterprise for the 21st Century Gerald A. Cory, 1992      *The Evolutionary Neuroethology of Paul MacLean* Gerald A. Cory Jr., Russell Gardner Jr., 2002-12-30 In the mid 20th century integrative efforts began concerning the brain and its social and humanistic functions These efforts were led by Paul D MacLean s integrative research and thought As the century ended however such efforts were lost in the surge of new effort in brain and genome research Nobel Prizes were awarded on biochemical and cellular findings relevant to psychiatry Findings on these levels seemed to provide ultimate answers By contrast Cory Gardner and their contributors provide a more comprehensive view by extending MacLean s findings and integrative theory Supported by new findings and extended by critical analyses of current work the collection provides foundations for more integrative efforts that the editors and contributors believe will prevail increasingly in coming decades Looked at from another vantage point therapeutic social economic and political sciences have proceeded without operating theories congruent with or based on brain functions Across species perspectives have been lacking This collection redresses this problem and leads the way toward more comprehensive 21st century research on the one hand and practical applications on the other Multiple approaches extend from modeling efforts to across species comparisons to the basic science of psychiatry to theoretical explanations of political and economic systems But most important these essays abolish the Berlin wall that currently separates the brain from its social functions A major guide for scholars students and researchers involved in the neurobehavioral sciences for psychologists psychiatrists and others involved with human clinical sciences and for social scientists concerned with the impact of the nervous system and its function      **The Consilient**

**Brain** Gerald A. Cory Jr., 2012-12-06 The present work is the third in a series constituting an extension of my doctoral thesis done at Stanford in the early 1970s Like the earlier works *The Reciprocal Modular Brain in Economics and Politics* *Shaping the Rational and Moral Basis of Organization* *Exchange and Choice* Kluwer Academic/Plenum Publishing 1999 and *Toward Consilience The Bioneurological Basis of Behavior* *Thought Experience and Language* Kluwer Academic/Plenum Publishing 2000 it may also be considered to respond to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology Ecology as a general field has emerged in the last quarter of the 20th century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions      **Toward Consilience** Gerald A. Cory Jr., 2012-12-06 The present work is the second in a series constituting an extension of my doctoral thesis done at Stanford in

the early 1970s Like the earlier work *The Reciprocal Modular Brain in Economics and Politics* Shaping the Rational and Moral Basis of Organization Exchange and Choice Plenum Publishing 1999 it may also be considered to respond to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology th Ecology as a general field has emerged in the last quarter of the 20 century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions

**Economic Biology and Behavioral Economics** Gerald A. Cory Jr., 2022-12-30 Economic Biology and Behavioral Economics The Prophecy of Alfred Marshall explores the prophecy of Alfred Marshall the grand synthesizer of neoclassical economics that the Mecca of the economist lies in economic biology The book presents the proof of that prophecy through examination and establishment of the fundamental biological science necessary and then applying that science to the examination of current economic theory In doing so the book focuses primarily on the fundamentals of neoclassical economic theory which is the reigning theory and the general framework of which is taught as science in first courses in college economics These courses are at best an idealization if not an ideology of the discipline presented to fresh minds misleadingly as confirmed science The book examines the bases and the history of these idealizations points to the sources of their error from the biological perspective and suggests a path forward for the discipline Through this process the book demonstrates the power of the biological perspective anticipated by Marshall This book provides invaluable reading for anyone interested in the future of economics and economic theory and particularly those interested in behavioral economics and neuroeconomics

**Six Capitals, or Can Accountants Save the Planet?: Rethinking Capitalism for the Twenty-First Century** Jane Gleeson-White,2015-02-25 A timely and fascinating account of the revolution going on in the world of finance from the acclaimed author of Double Entry This is the story of a twenty first century revolution being led by the most unlikely of rebels accountants Only the second revolution in accounting since double entry bookkeeping began it is of seismic proportions driven by the 2008 financial crash and our ongoing environmental crisis The changes it will wreak are profound and far reaching and not only will transform the way the world does business but also will alter the nature of capitalism While the wealth of nations and corporations has been vital to the global economy increasingly the world is coming to realize that such endless growth is limited by the earth s resources and comes at a huge price to the planet and to human well being It simply cannot be sustained This revolution demands that we go beyond merely accounting for traditional financial and industrial capital and take account of the benefits and detriments to the natural world and society It urges us to include four new categories of wealth intellectual such as intellectual property human skills productivity and health social and relationship shared norms and values and natural environment Making them part of our financial statements and GDP figures may be the only way to address the many calamities we face Just two years ago this revolution seemed idealistic and unlikely Today it is quickly unfolding In 2012 the sea change year two key initiatives took root an international movement to transform how corporate accounting is calculated and the rise of incorporating the effects on the environment to the accounting of national and global economies Six Capitals tells the story of this coming new age in capitalism evaluating its promise and the disaster that lies ahead if it is not implemented

**Getting to Green: Saving Nature: A Bipartisan Solution** Frederic C. Rich, 2016-04-18 Regardless of your place on the political spectrum there is much to admire in this book which reminds us that the stewardship of nature is an obligation shared by all Americans U S Senator Angus S King Jr The Green movement in America has lost its way Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most Congress has not passed a landmark piece of environmental legislation for a quarter century As atmospheric CO2 continues its relentless climb even environmental insiders have pronounced the death of environmentalism In *Getting to Green* Frederic C Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis Rich reminds us of American conservation's conservative roots and of the bipartisan political consensus that had Republican congressmen voting for and Richard Nixon signing the most important environmental legislation of the 1970s He argues that faithfulness to conservative principles requires the GOP to support environmental protection while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth With a clear-eyed understanding of past failures and a realistic view of the future *Getting to Green* argues that progress on environmental issues is within reach The key is encouraging Greens and conservatives to work together in the space where their values overlap what the book calls Center Green Center Green takes as its model the hugely successful national land trust movement which has retained vigorous bipartisan support Rich's program is pragmatic and non-ideological It is rooted in the way America is not in a utopian vision of what it could become It measures policy not by whether it is the optimum solution but by the two-part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically Application of the Center Green approach moves us away from some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change energy policy and other crucial issues This is how we get to Green

*Class Questions* Joan Acker, 2005-12-08 Class is a particularly troublesome issue in the United States and other rich capitalist societies In this feminist analysis of class noted sociologist Joan Acker examines and assesses feminist attempts to include white women and people of color in discussions of class She argues that class processes are shaped through gender race and other forms of domination and inequality *Class Questions Feminist Answers* outlines a theory of class as a set of gendered and racialized processes in which people have unequal control over and access to the necessities of life processes including production

distribution and paid and unpaid labor Historically gender and race based inequalities were integral to capitalism and they are still fundamental aspects of the class system Acker argues that capitalist organizations create gendered and racialized class inequalities and outlines a conceptual scheme for analyzing inequality regimes in organizations Finally the book examines contemporary changes in work and employment and in economic political processes including current events like deregulation downsizing and off shoring that increase inequalities and alter racialized and gendered class relations This book will appeal to readers interested in a feminist discussion of class as a racialized and gendered process intimately tied to the capitalist economic system
