Accompany's ISBN: 9780073532028 *The Process of Research in Psychology* Dawn M. McBride, 2023-08-30 With a structure focused on process over memorization, best-selling author Dawn M. McBride's *The Process of Research in Psychology*, Fifth Edition, covers topics with a step-by-step approach to help students understand the full progression of developing, conducting, and presenting a research study from start to finish. Early chapters introduce important concepts for developing research ideas, subject sampling, ethics, and data collection; more detailed coverage of these topics is included in the "More About" chapters to provide instructors with flexibility to focus on the methods students will use in their projects. Concepts and skills relevant to more than one stage of the research process are covered in multiple contexts to give students repeated opportunities to learn about the most important and often most difficult research concepts at the moment they're used. This new Fifth Edition features added discussion on validity and reliability, a reorganized chapter on survey research to group topics more clearly, and to provide more information on qualitative analysis; more questions in the "Test Yourself" quizzes at the end of each chapter to focus more on application and additional references to the increasingly popular statistical software programs JASP and R. *Instructor's Manual for Research Design and Methods, a Process Approach* Kenneth S. Bordens, 1988 *Merged Methods* Giampietro Gobo, Nigel G. Fielding, Gevisa La Rocca, Wander van der Vaart, 2021-10-27 A new turn in mixed methods research is here: merged methods. This provocative book offers a novel analysis of current mixed methods research, complicating traditional approaches and challenging existing techniques. Moving beyond the binary quantitative/qualitative distinction, the book presents methodologically grounded ways to merge methods in social research and integrate interpretive and structural approaches in one instrument or procedure. The book considers the importance of merging both epistemologies and methodologies, showcases eight merged methods research approaches from the Delphi method to multimodal content analysis, explores the opportunities for merging methods using computational techniques such as text mining. This innovative book is a must-read for any postgraduate student or researcher across the social sciences wanting to develop their understanding of mixed methods research. *The Process of Business Model Innovation* Georg Stampfl, 2015-12-03 Georg Stampfl explores in detail the nature of business model innovation processes in established companies from the organizational and the individual perspective. He outlines when and why the process of business model innovation is started, how the process of business model innovation unfolds, and what contributes to or inhibits success. Moreover, the author investigates how individuals discover new business models and how

innovation teams collaborate in business model innovation projects Based on these insights the author provides helpful guidelines on how companies can tackle the business model innovation challenge
