Materials Needed

- Scissors
- Glue
- Printed circle templates
- String or yarn

Instructions

1. Choose four templates. Print the circle templates.

3. Cut out circle out.
4. Fold the circle in half vertically.
5. Draw with two circles. Glue the back half of one circle to the top half of the other.
6. Be sure to glue the back sides together, not the front sides. This allows the writing surface template to show in the final product.
7. Next, take circle three and continue with the gluing pattern above.
8. Before gluing the last two circles together, tape a piece of string or yarn to one side. The string should be short or cut so the circle is not enough hanging out of the top to hang it from the desired height.

Espeland, 2021-05-08 This book is a

collection of leading international authors in the field of music education taking the concept of craft as a starting point to deconstruct and reconstruct their understanding of the practices and theories of music education Their insights draw from deep wells of resources located in historical philosophical epistemological musicological and educational traditions that lead to rich and complex insights on the evolving field of music education In so doing they generate a constellation of new understandings and illustrations of what crafts can mean in this field Historically the idea of craft was typically associated with a skill or experience in knowing how to do or make something or an activity of some kind that requires specific professional skills In Old Norse the concept for craft was *kraptr* meaning strength and virtue while Old English and continental use was associated with power and physical strength as well as skill When these definitions of crafts are infused into contemporary understandings of the field of music education as a professional field a whole new set of possible interpretations are unearthed Such insights are not exhaustive but rather point the way in which this professional diverse inclusive and ambiguous field might continue to evolve in the 21st century **Roycraft: Western New York Craft and its**

neighborhood studies alternately focusing on specific geographic areas public programs and types of citizen actions Because most of these efforts were done on a project by project basis it did not readily occur to me that these separate investigations also represented an aggregate statement about American neighborhoods the continuing and complex relationship between public policy and neighborhood life A suggestion by Lloyd Rodwin the senior editor for this series provided the opportunity to reexamine the various manuscripts and to select and in some cases considerably edit those bearing most on this overall theme Thus each of the chapters in this book is a commentary on the potential uses of public policy for preserving the most cherished aspect of contemporary neighborhoods the social life within them In some cases the policy actions may have only an indirect effect on neighborhoods For instance a whole portion of the book is devoted to the role of research in understanding neighborhood conditions public policy is relevant because research these days has itself become a public policy enterprise In other cases the policy effects are direct and pervasive the support of citizen organizations the delivery of neighborhood services and the provision of timely and relevant information to residents I do not know whether the relationship between public policy and neighborhoods is the same or as intimate outside the United States **Spinoff** ,1990
