**The Reading Race** Donna Awatere Huata, 2002 Author exposes the inadequacy of the present system of teaching reading in New Zealand schools and proposes a

clear effective solution using systematic phonics      **Boundless Horizons** Billie J. Askew, Barbara Watson, 2009 Boundless Horizons tells the extraordinary story of Marie Clay's lifelong search for new possibilities in teaching young children to read and write. She pursued a tantalising quest: What is possible for children with reading problems? What would have to change? Observing young readers in ordinary classrooms, she uncovered explanations of how children take on literacy learning and how that learning changes over time. From those discoveries arose the internationally successful literacy intervention for children having temporary difficulty: Reading Recovery.      *Characterizing Teacher-student Interaction in Reading Recovery Lessons*, 1994      *Reading Recovery* Gay Su Pinnell, 2000      *Advances in Education Research*, 1993      **Research on the Effectiveness of Reading Recovery in New Jersey** Jill A. Mulford, 1994      **Evidence Check 1** Great Britain. Parliament. House of Commons. Select Committee on Science and Technology, 2009 This report HCP 44 session 2009-10 ISBN 9780215542663 from the Science and Technology Committee looks at literacy programmes: evidence check and concludes that expectations by the Department for Children, Schools and Families of the quality of the evidence base for reading programmes are worryingly low. It urges the Government to commission randomised controlled trials (RCTs). The Committee also states it is particularly concerned about the quality of evidence demonstrating cost effectiveness of different programmes and further recommends that the Government reviews its guidelines on RCT design: it says even Wikipedia is more thorough and informative. The Committee also concludes that the Government's focus on early literacy interventions and phonics-based teaching is based on the best available evidence; the use of Reading Recovery is based on a lower quality of evidence than the Committee is comfortable with and that the decision to introduce Reading Recovery nationally is not evidence-based. The Committee further expressed alarm that there was a complete lack of randomised controlled trials using standardised test scores for the Reading Recovery programme in the UK school system before national implementation of the programme.      **Reading Recovery** Gay Su Pinnell, 1995      **Reading Recovery** Megan M.
