If the issue of methodology is essential for any researcher, it is perhaps even more so in African Studies. Area studies start primarily from a geographical and empirical, not a theoretical delimitation of their object of research. This makes the problem of the relevance of methods in relation to a complex and multilayered research object the first obstacle to overcome. Interdisciplinarity is, of course, the answer, but most researchers abandon this attractive approach when they move towards realism in assessing the extent of what they can reasonably handle. The individualism deeply entrenched in the academic profession makes the results of many (interdisciplinary) collective research projects often hypothetical. Researchers are faced with the usual problem of trying to marry a concern for accurate assessment of multidimensional realities with a more focused and rigid scientific approach, or the conflict between 'area studies and the discipline'¹?

The Routledge Handbook of Research Methods in the Study of Indigenous Religions Afe Adogame, Graham Harvey, 2025-03-31

Exciting developments in research among with and by Indigenous scholars and communities are enriching a wide range of disciplines, methodologies and trans disciplinary conversations. This growing field offers important insights and provocations about methods and approaches. Key issues such as relationality, decolonisation, research ethics, pedagogy and collaboration necessarily require improvements both in scholarly description and in scholarly practice. Similarly, critical themes for Indigenous people intersect strongly both with recent scholarly turns such as embodiment, gender, performance, place, ontology and materiality. The Routledge Handbook of Research Methods in the Study of Indigenous Religions reflects on appropriate approaches and methods with over 28 chapters by a team of international contributors. The Handbook is divided into three parts: Core themes and critical issues in research and debate about Indigenous Religions; Disciplines and methods focusing on ways in which researchers gain and share understanding about Indigenous religions; Recent scholarship about broad regions of the world. Within these sections, central issues, debates and problems are examined, including cosmology, diaspora, bodies and materiality, witchcraft and divination, ritual studies, ethnography and fieldwork, heritage studies, ecology, feminist methodologies, decolonial methods and Indigenist methods, research ethics, activism, health and peoplehood, kinship and relations. The Routledge Handbook of Research Methods in the Study of Indigenous Religions is essential reading for students and researchers in religious studies and Indigenous studies and the handbook will also be very useful for those in related fields such as sociology, anthropology, history and politics.
