**A History of the Royal College of General Practitioners** John Fry, R.J.F.H. Pinsent, 2012-12-06 John P Horder President 1980-82 The first 30 years of the College have been an exciting experience for those most closely involved Some have already passed on but this account has been written soon enough for many of the actors to be historians Future members of the College will be grateful to them for what they have written as well as for what they did as a remarkably determined and harmonious team Students of twentieth century medicine in this country will also be grateful for a first hand account of the development of an institution which has been closely associated with and partly responsible for important changes in medical care and education Those who read these pages may wonder how the builders of this young College could have found time to do much general practice They did The three editors of this history which covers 25 years and the general practitioner members of the Steering Committee all ran large practices in which they worked very hard throughout that time Most of their work for the College was done during off duty hours weekends and holidays The College could not have developed as it did had they not been personally concerned with the practical problems and needs of clinical medicine This is also true of many of the contributors It is impossible to mention everyone who deserves credit The editors hope that they may be forgiven for any serious omissions

G. R. Howie, 2013-11-11 One of the paradoxes of general practice is that we emphasize on the one hand how important it is that the general practitioner learns to tolerate uncertainty and then regret on the other hand that so few general practitioners research the uncertainties they find in their every day work In the first chapter of my first edition of this book I suggested that general practitioners were missing opportunities to take part in a fascinating and rewarding professional activity because of an unnecessary fear of the unknown and tried to encourage more to try research for themselves There has been an impressive increase in what has been asked about researched and written about in the last decade and this second edition tries to bring up to date the advice I think may help others to become involved in research for themselves The basic principles of good research are of course timeless and apply to enquiry in any discipline However detail changes there are new aids to reviewing literature the increased emphasis in social science research has been matched by a range of new methods of collecting information computers have revolutionized how data is handled and statistics is an ever developing science in its own right The chapters in this book which describe what can be referred to as the technology of the research process have been revised to reflect the impact of these recent developments rather than re written **Research Methods and Audit in General Practice** David Armstrong, John Grace, 1994 Many of those working in primary care wish to
