Berlin, the Mother of All Research Universities
Charles E. McClelland, 2016-10-27 This work is the first major reexamination in English of the rise of the world's pioneer modern research university It presents an authoritative history of science scholarship and education offering readers a background platform from which to confront looming issues about the future of higher education systems everywhere but especially in the United States The innovations of the new model University of Berlin reached their highest point of development and influence on foreign adopters of technology transfer under the new German Empire before World War I These innovations were grafted onto and shaped American higher research teaching and professionalization like no other influence in the twentieth century No previous book in English has described this impressive conscious creation of an institution promoting cutting edge research in fields from physics and medicine to law and theology combined with the highest standards of active self involved student learning for the higher professions Yet even at the moment its astonishing institutional achievements became the inspiration for the brilliant rise of the American research university over the last century its own contradictions and limitations were already beginning to appear in the 1920s Indeed since the University of Berlin was originally little more than a new reformed German university before 1860 and subsequently faced the disadvantages of financial ruin of the 1920s and the imposed wreckage of the Nazi and East German Communist regimes from 1933 to 1990 the period 1860-1918 is the one of greatest interest for the development of what came to be a world wide model for emulation Today when the entire concept of the elite research university is under attack revisiting its origins in Germany should provide stimulus to the debates about the future of the university not only in North America and Europe but in all countries with higher education systems modeled on or influenced by the German or American ones e.g. Australia India The question of whether future innovative science and scholarship should remain coupled with teaching institutions as in the Berlin model can best be explored against the background of the emergence of that model

Ph.D.,2023-11-08 How has our higher education system become so corrupt and unsustainable while undermining our freedom behind closed doors Imagine sending your conservative daughter off to your state s flagship university After six long

years not the four years you expected she returns home with a bachelor s degree in one of the studies She returns home to live because she can t find employment sufficient to support herself As heartbreaking as that is you soon discover she is now a socialist hates America and blames men for a patriarchal society she believes ruined her life She left home full of love but returned filled with hate Unfortunately that is not imaginary and there is no place to turn Our 4 000 independent universities act as one and their 1 5 million professors hold homogenous views This single mindedness has eliminated free speech and critical thinking by students and faculty alike Confessions of a Professor provides an insider s in depth analysis of our universities destructive actions in three broad areas First it details their failure to educate students to contribute to society Second it exposes academia s politicized research that helps form government policy Finally it documents academia s actions to undermine us at home and betray us abroad Beyond those issues it explains academic research in an easily understood manner It shows how academic studies align with the new Socialist Democrat party and drive regulations that control our lives As bad as their politicized science is and their students experiences can be this book also exposes the extent of racism in the name of diversity Similarly it reveals how the war on men has led to 50% more women attending universities and much worse But even if all these issues were rectified academia s traitorous relationship with China is enough alone to condemn the institution As this book shows we cannot maintain an advanced society without a higher education system but ours is failing America and actively undermining us internationally The author provides over 500 references to support these findings Public Health Service Publication ,1961 **Perspectives on School Learning** L.
